Packaging Choice and Sustainability

NOVOLEX's Bagcraft® Packaging brand offers the industry's broadest range of paper based specialty value-added food packaging products including specialty bags, sandwich wraps, and other specialty sheet and roll products.

Bagcraft® Packaging products are used across a wide range of foodservice, restaurant, supermarket, convenience store, bakery, food processor and industrial packaging applications. Bagcraft® is also a leader in sustainability innovation with its EcoCraft® brand of flexible foodservice packaging. With a legacy of superior quality and product innovation that spans over six decades, Bagcraft® is the consultant of choice to drive your business growth and brand differentiation with custom packaging solutions.

Sustainability

A continuous journey of improvement

Novolex is a leader in sustainable paper and plastic flexible packaging with a broad portfolio of solutions focused on source reduction, energy and water conservation, and end of life product planning and management.

Some of the Novolex™ sustainability solutions we bring to our customers include: recycled content plastic and paper products, compostable plastic and paper products, renewable substrates, Novolex's Bag-2-Bag® plastic bag and film recycling program, lower impact substrates such as our EcoCraft® line of paper products, and other industry leading innovations that minimize raw materials while maximizing performance.

I-Rap®

Insulated Wraps & Tray Liners

Performance Features

- Patented design of I-Rap® paper allows steam and moisture to escape to keep foods fresh while providing insulation for added heat retention
- Provides grease resistance and heat retention without a wax, foil or poly barrier
- Commercially compostable and is made from EcoCraft® paper for added sustainability

Item #	UPC #	Description	Dimensions	Case Pack	Case Weight	Case Cube	Cases/Pallet	Pallet TI HI

Dubl Shield®

Insulated Sandwich Wraps

Performance Features

- High-performance wrap for a wide range of demanding applications
- Triangle shaped design creates insulating air pockets keeping food hot and fresh longer than standard wraps
- Excellent moisture and grease resistance
- Superior heat retention keeps food hot longer than standard one and two ply paper wraps
- Innovative functionality keeps different varieties of bread moist or crisp depending on which side of the wrap contacts the food
- Upgrade the sustainability of your packaging with the combined benefits of EcoCraft® and commercial compostability

Freezer Paper

EcoCraft® Freezer Paper

Performance Features

- Less reliance on non-renewable petroleum based poly resin
- Reduced paper fiber used due to a 80% recycled sheet with 40% post-consumer fiber content
- Soft and pliable freezer sheet with improved
- Offers an average of 3-6 months protection feel and acceptance with operations
- Improved barrier and "Moisture Vapor Transmission Rate" due to natural filler in poly blend

Improved sustainability due to less paper and poly material needed to meet functionality requirements offering an innovative product design

C-Thru™ Display Bags

Performance Features

- Extends product freshness when bag is sealed
- Innovative vertical window runs the entire length of the bag to provide a full view of the contents
- Complete visual display of contents aids in impulse buying and store security
- Multiple sizes can be merchandised together to provide a family package design option
- Up to 8 color custom line or process print
- Reinforced paper patch bottom adds extra strength to keep contents secure inside the bag, and can be printed with a black random design or one color UPC code

Packaging Materials Defined

Tissue

Dry Wax

Dubl Wax®

Grease Resistant

Barrier Wax

Tissue

An untreated, lightweight tissue sheet with wet strength used for wrapping hot dogs, cones and foods with low moisture or grease content. Improve the “ease of eating” qualities of burgers by wrapping half the burger in our tissue wrap, then wrap the whole burger in a grease resistant, barrier wax, I-Rap®, insulated paper or foil insulated wrap for superior functionality and food presentation.

Dry Wax

Wax is driven into the paper fibers to produce a material that improves wet strength and moisture resistance. The paper provides good moisture resistance and moderate grease resistance. Our dry wax material is an affordable option for basic deli food wrap or bag applications.

Dubl Wax®

We use two different technologies to create Dubl Wax® paper. Our bags are coated on one side with heavy wax and on the other side with dry wax, which provides a strong moisture and moderate oxygen barrier to keep baked goods fresh longer. Our Dubl Wax® deli papers are aggressively infused with wax to provide a smooth uniform high-performance moisture barrier.

Grease Resistant

A grease resistant coating is applied to this paper to decrease grease penetration and staining. The paper creates a whiter, more opaque printing surface for custom logos or designs compared to dry wax. The paper is very breathable, which keeps wrapped or bagged sandwiches fresher and less soggy by letting steam and moisture escape. This material offers an affordable and functional solution for a variety of food-wrap and single serve bag applications.

Barrier Wax:

This paper is coated on one side with a barrier wax blend. The material resists moisture and grease and extends holding times making it a favorite wrap among national quick service restaurant chains.

I-Rap®

A two-layer insulated paper wrap that combines a layer of grease resistant paper and a layer of absorbent paper bonded together with a honeycomb adhesive design to create air pockets, which provide improved insulation, heat retention and longer holding times. I-Rap® provides heat retention for hot food applications without a wax, foil or poly barrier. The two-ply paper wrap is biodegradable and commercially compostable. Our I-Rap® insulated paper allows moisture and steam to escape naturally, which keeps breads from getting soggy.

Dubl Shield®

Our innovative insulated Dubl-Shield® wrap has a highly functional grease and moisture barrier, but will allow moisture to escape, which keeps your bread or bun from getting soggy and losing freshness. The wrap has superior graphic printability on the flat grease resistant outer layer. Improved sustainable design offers an alternative to foil and poly insulated wraps and it's certified compostable by Cedar Grove, which gives it a clear end of life advantage. Dubl Shield® can be printed on the grease resistant layer with one to four colors and can be produced with tinted adhesive to showcase a message or graphics on the inside of the wrap. Our proprietary triangle design air pockets help keep food hot during the average seven minute holding time, before consumption.

Clear Polypropylene:

A clear plastic sheet with superior barrier properties for displaying cold sandwiches and other chilled foods in the deli merchandising case. The material extends the shelf life of displayed food with an oxygen and moisture barrier. Our clear polypro wraps improve the visibility, upscale image and impulse sales of your deli products.

Insulated Three Ply

A three-ply material, consisting of a very thin layer of poly sandwiched between two layers of paper, with excellent heat retention, grease resistance and moisture-absorption properties. It offers a superb alternative to paperboard clamshells in heat retention for holding times and in solid waste reduction. The material is safe for the microwave providing a practical, re-heatable substitute for foil insulated wraps. This multi-purpose wrap combines superior performance with a professional-grade look and feel to reinforce a quality image with customers.

Foil Insulated

Made of foil and paper laminated together to form a multi-functional material for a wide variety of foodservice applications. We laminate the two layers together with a honeycomb-shaped adhesive design. This design creates insulating air pockets between the layers, which improve heat retention and increase holding times. Honeycomb foil insulated wraps and bags provide the best overall heat retention, moisture/grease resistance, holding times, dead-fold and product appearance. Bagcraft® Packaging was the first company to manufacture this foil insulated wrap with the honeycomb design, and we continue to be the industry leader in flexible sandwich packaging innovation.

Custom Converting & Printing Capabilities

Bagcraft® Packaging offers the broadest range of specialty bag, sheet and roll converting capabilities in the flexible foodservice packaging industry. We manufacture high-quality custom packages on 148 different production lines to provide a wide variety of custom package and print designs. With our efficient, superior F&K presses, we can deliver state-of-the-art graphics capabilities that help differentiate your products on the shelf and on the go. Our long-term commitment to innovation and practical solutions enables us to expertly consult with you on packaging design, process graphics and rigid packaging replacements.

Please review the information we need before you request a quote for a custom product

Provide the individual bag, sheet or roll size

- Bag (width, gusset, length)
- Sheet (width and length)
- Roll (roll width and length or outer diameter)

Initial order quantity needed and the annual volume (units or cases)

Name of printed design or logo

Basis weight of paper if known

Type of paper or combination of materials (foil, bio-film or glassine)

Need a film window?

- Provide an explanation of the proposed window die or panel location on the package

Number of printed colors (provide PMS numbers)

Product application (what will the package be used for?)

Case pack sizes

Shipping/distribution information

How to measure a bag for quotes and production:

- Measure the face of the bag (width)
- Measure the gusset of the bag (side width)
- Measure the length of the bag (not including lip)

If you have a specific question about our custom or graphics capabilities, please call 800-621-8468, ext. 8012.

Natural Advantages of EcoCraft®

- Made with FDA food-grade, 100% unbleached, chlorine-free paper
- Packed in 100% recycled paperboard inner-carton and tray dispenser packaging to reduce raw-material waste
- Soy-blended dry wax on interfolded sheets reduce reliance on petroleum wax
- New dispenser carton and tray design includes printed facts and information about the sustainability benefits of EcoCraft®
- EcoCraft® products, on average, contain 20% pre-consumer waste fiber
- Multiple EcoCraft® products are third-party certified compostable
- Reduces your carbon footprint by purchasing form-fitting, "right size," flexible packaging with high case counts and small case-cube size
- An experienced national network of sales representatives that can help advise your business on ways to improve your sustainable packaging design

We believe in the continuous "Triple Bottom Line" approach of sustainable packaging design improvement:

Social Responsibility – good for the people

Ecological Responsibility – good for the planet

Economic Responsibility – affordable choices

With our EcoCraft® brand, we were the first company to offer a full stock line of unbleached, sustainable foodservice packaging in North America. We believe sustainability is an ongoing journey of continuous improvement and evolution. This approach propels us to constantly enhance our sustainable practices and products. **This commitment to affordability and innovation has allowed Bagcraft® Packaging to create the most recognized brand of sustainable flexible packaging available in the industry.**

*Environmental impact estimates were made using the Environmental Paper Network Paper Calculator Version 3.2. For more information visit www.papercalculator.org.

Our EcoCraft® Journey

Novolex™ is committed to the protection of the earth through recycling and promotion of sustainable products. We are proud to hold certificates for the following organizations:

Forest Stewardship Council®

The FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests. The unique role of the FSC® is to bring together people, organizations and businesses to develop consensus-based solutions that promote responsible stewardship of the world's forests. Bagcraft Packaging™ uses the FSC® Trademark License C122272 for certified chain of custody products made at all Bagcraft plants.

The mark of
responsible forestry

SCS Global Services (SCS)

SCS Global Services (SCS) has been providing global leadership in third-party environmental and sustainability certification, auditing, testing, and standards development for nearly 30 years. They are accredited to provide services under a wide range of nationally and internationally recognized certification programs. Working with SCS Global Services, Novolex has earned FSC Chain of Custody certification for its Bagcraft lines of 100% post-consumer recycled bags. The FSC® certified paper used for the manufacturing of these bags can be tracked through the supply chain including collection from the end user, sorting, paper making, transport, bag making and shipment of the finished product.

How2Recycle

Novolex™ is proud to support organizations like the Sustainable Packaging Coalition (SPC) that promote industry wide sustainability initiatives such as How2Recycle the next generation of standardized recycling symbols. We are proud to work with our customers and the SPC to get the right markings on your products. Learn more at: **How2Recycle.info**
