# Are you in the loop?

USE RENEWABLE RESOURCES

DIVERT ORGANICS FROM LANDFILLS

When food scraps are composted, they create a valuable soil amendment. Using compost in soil conserves water, reduces storm water run-off, improves plant health, and minimizes the need for artificial fertilizers (among many other benefits). Using compostable packaging eliminates having to separate food from its container at the bin.

## Do you want to get to Zero Waste?

Or maybe you're not reaching for zero, but you want to keep as much material as possible out of landfills. Good for you! There are two approaches foodservice operators can take to divert materials from landfills: recycling and composting.

### Recycling works by turning landfill-bound material into new products.

**As you can imagine, the companies buying material to recycle it into something else don't want food.** Dealing with crumbs and old cheese is difficult and expensive, not to mention gross.

Therefore, food must be separated from packaging if the packaging is to be recycled. Unfortunately baseball fans, concert goers, and restaurant customers aren't very good at sorting. It's extremely likely a lot of food will end up in the bin designated for packaging. For recyclers, this is not cool. If they consistently get too much stuff they don't want, they may stop accepting the material altogether. Also, there aren't many people who want to repurpose old nacho trays, so these items have low value and are very difficult to recycle.

### Now let's talk about composting.

**Composters WANT food!** It adds nutrients to the composting process. This means any leftover food and compostable packaging should end up in the same bin. Easy! Finished compost can be used to grow more plants, which can be turned into cups. We love closed loops.

It's crucial for waste diverting foodservice operators to take a systems-based approach. Planning to use all compostables at the outset means no one will have to decide what goes where and get bin paralysis.

Get in the loop. Compostable packaging makes it easy for organizations to close the loop and get to Zero Waste.

### A systems-based approach makes it easy for you and your customers

Exclusive use of compostable packaging

Simple bin decisions (or none at all)

Clean stream of organics for composters to turn into soil amendment.

#### What does "Zero Waste" mean?

(Psst... it's not as scary as you might think)

The Zero Waste International Alliance defines "Zero Waste" in part as: "a goal that is ethical, economical, efficient and visionary, to guide people in changing their lifestyles and practices to emulate sustainable natural cycles, where all discarded materials are designed to become resources for others to use."

In practice, it is an aspiration. Why not aim for the ideal end state? While it is unlikely most organizations will actually achieve Zero Waste to landfill, striving for all materials to be a useful input for something else is the best way to inspire meaningful action.

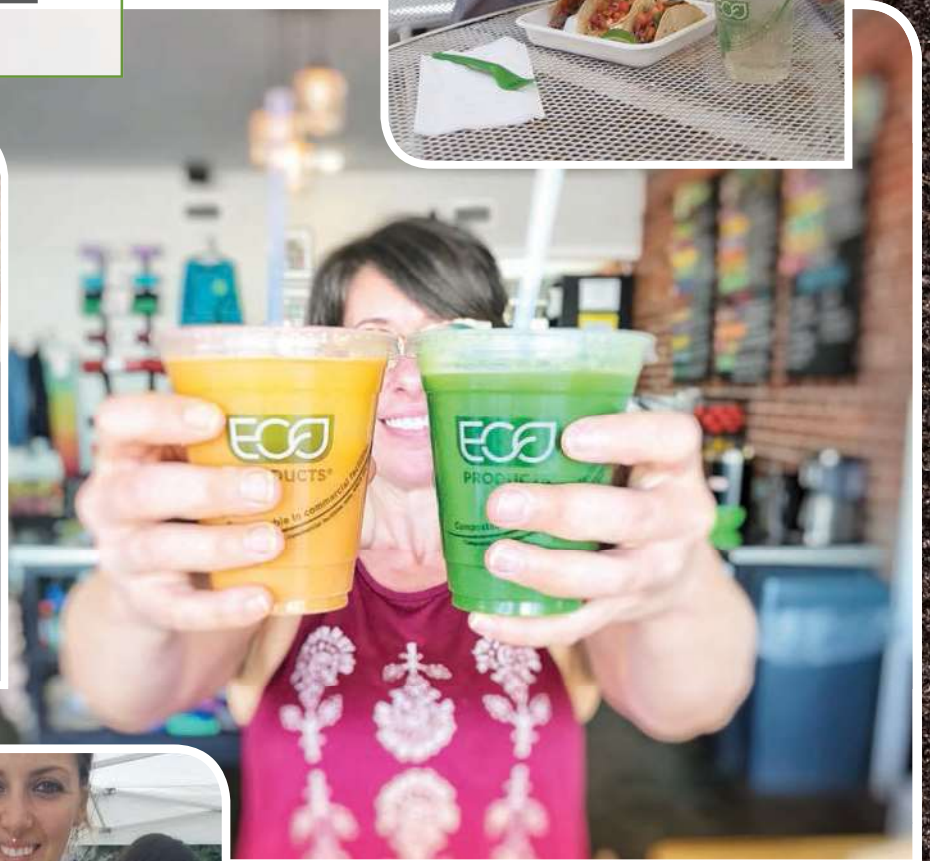

**Many organizations consider themselves "Zero Waste" when 90% of their materials are diverted from landfills and incinerators.** However, regardless of the number, an organization is on the Zero Waste journey when it is making meaningful strides to eliminate waste.

**Every product in this catalog is compatible with Zero Waste programs.**

## VISION

ECO-PRODUCTS®  
WILL BE IN THE  
VANGUARD OF OUR  
ZERO WASTE  
FUTURE

• Thanks to Root2Rise for sharing this image with us.

## MISSION

WE UNDERSTAND THE  
CONNECTION BETWEEN  
THE HEALTH OF THE PLANET  
AND THE IMPACTS OF  
DISPOSABLE PACKAGING.

EVERY DAY WE WORK TO  
ADVANCE ZERO WASTE SYSTEMS,  
AND HELP OUR CUSTOMERS  
BE BETTER STEWARDS OF  
THE ENVIRONMENT.

We're the most recognized and authentic brand in sustainable foodservice packaging. As category leaders, we're able to deliver expertise, benefits and services that are unavailable anywhere else on the market. **We got this.**

## BUNDLE

- A one-stop shop assortment with 350+ SKUs
- Two product lines offer choice of environmental benefits
- Third-party certifications back up our environmental claims

BUNDLE

## CUSTOMIZATION

- Custom print
- Custom emboss
- Custom product development

CUSTOMIZATION

## ADVOCACY

- Thought leaders of Zero Waste systems
- Driving expanded access to composting infrastructure
- Dedicated sustainability expert on staff

ADVOCACY

## SERVICES

- "Included in the Box"
- Marketing and communications services
- Custom life-cycle assessment reports
- Zero Waste consulting

SERVICES

# BUNDLE:

We're big fans of a systems approach to waste diversion featuring a comprehensive line of consistently branded disposables. We make 350+ SKUs, and we're continually developing new products to serve everything from apple fritters to zucchini tots.

## Product Features

MICROWAVE FRIENDLY

DO NOT MICROWAVE

COLD FOOD FRIENDLY

HOT FOOD FRIENDLY

BPI CERTIFIED COMPOSTABLE

## GreenStripe® - Renewable & Compostable\*

RENEWABLE RESOURCES

- Made from renewable plant materials that can be grown again and again.
- All GreenStripe® products (except PSM Cutlery) are compostable, which means they can be returned to the soil to help plants grow.
- Compostable GreenStripe® products are ASTM compliant and BPI certified compostable in commercial facilities only, which may not exist in your area.
- Not made from oil like traditional plastics.
- Not suitable for backyard composting. These products need the high heat and careful management of a commercial pile to break down.
- Paper and Sugarcane products can go in the freezer, although they are not airtight, so freshness and freezer burn can become issues if left there for too long. PLA can become brittle when frozen, so we don't recommend putting these products in the freezer.

Material Type	What it is	Why we use it	What we use it for
 INGEO™ PLA	<ul style="list-style-type: none"> <li>• Polylactic acid</li> <li>• Plastic made from starchy plants like corn, grown right here in the United States</li> </ul>	<ul style="list-style-type: none"> <li>• Looks and feels like traditional plastic, but is compostable in commercial composting facilities</li> <li>• Want a plastic cup without the petroleum? Here it is.</li> </ul>	<ul style="list-style-type: none"> <li>• Cold Cups</li> <li>• Lining for Hot Cups &amp; Paper Food Containers</li> <li>• Lids</li> <li>• Cutlery</li> <li>• Clear Containers</li> </ul>
 SUGARCANE	<ul style="list-style-type: none"> <li>• Also known as bagasse</li> <li>• Made from the stalk left over after the cane juice is extracted to make sugar</li> </ul>	<ul style="list-style-type: none"> <li>• Renewable and fast growing</li> <li>• Bagasse fiber is a byproduct that would otherwise be discarded or burned</li> <li>• Compostable in commercial facilities</li> </ul>	<ul style="list-style-type: none"> <li>• Plates</li> <li>• Bowls</li> <li>• Containers</li> <li>• Trays</li> </ul>
 SUGARCANE & BAMBOO BLEND	<ul style="list-style-type: none"> <li>• Mix of bagasse and bamboo fiber</li> </ul>	<ul style="list-style-type: none"> <li>• Renewable and fast growing</li> <li>• Bagasse fiber is a byproduct that would otherwise be discarded or burned</li> <li>• Compostable in commercial facilities</li> </ul>	<ul style="list-style-type: none"> <li>• Plates</li> <li>• Bowls</li> </ul>
 WHEAT STRAW	<ul style="list-style-type: none"> <li>• Stalk leftover after wheat grains are harvested</li> </ul>	<ul style="list-style-type: none"> <li>• Renewable and fast growing</li> <li>• Straw is a byproduct that would otherwise be discarded</li> <li>• Compostable in commercial facilities</li> </ul>	<ul style="list-style-type: none"> <li>• Plates</li> <li>• Bowls</li> <li>• Containers</li> </ul>

## Renewable & Compostable Hot Cups

The Earth is amazing, and as far as we know, we only get one planet. So let's celebrate with a cup that's as special as Earth itself. The World Art™ Hot Cup pays tribute the planet. It's BPI certified compostable and returns to the Earth as perfectly as it holds drinks. Best of all, when the morning rush is over, its work has really just begun - with every Eco-Product, comes a whole force for good. We have your trash on our mind, and will do everything we can to ensure these cups and all our other compostable disposables return to the soil as effortlessly as they serve your patrons. Don't have a commercial composter in your community yet? you can still feel good knowing these products are made from 100% renewable resources. So raise a cup to this cup's environmental attributes.

- » Available in 8, 12, 16 and 20oz sizes
- » Made from 100% renewable resources
- » Lined with Ingeo™ biopolymer, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI certified compostable
- » World Art™ branding communicates your environmental commitment

## Renewable & Compostable Paper Food Containers

These may look just like your everyday soup cups, but they are oh so much more. Made entirely from materials that can be grown again and again, these cups fit into your life easily and without excess waste. Compostable, renewable, good looking and functional. You couldn't ask for a better fit.

- » Made from 100% renewable resources
- » Lined with Ingeo™ biopolymer, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI certified compostable

## GreenStripe® Cold Cups

This is not your (virgin plastic, non-compostable, non-recyclable) red party cup. This is the one and only GreenStripe® Renewable and Compostable Cold Cup! This cup holds drinks without leaking, rocks its environmental attributes, and is always the life of the party. Best of all, when it's time to go home, this cup is 100% certified compostable and returns to the soil...until your next bash.

- » Available in nine sizes
- » Dome, flat and sip lids
- » Made from 100% renewable resources
- » Made with Ingeo™ biopolymer, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI certified compostable

## Clear Grab & Go Containers

Life is all about choices, and isn't it a wonderful feeling to stand in front of a display case of beautifully arranged food in colorful stacks to choose what to eat for lunch? Say no to the waste that comes with old school containers and reach for something different. Fill your fridge with these attractive and environmentally preferable clear containers. Your customers will grab, go, and even better, come back again for seconds. They're clearly a better choice.

- » Made from 100% renewable resources
- » Made with Ingeo™ biopolymer, a plant-based plastic
- » Meet ASTM standards for compostability
- » BPI certified compostable
- » Cold food only

## WorldView™

Our WorldView™ Containers combine sugarcane bases with RPET or Ingeo™ lids for maximum strength and optimum presentation. Renewable & compostable Ingeo™ lids are perfect for cold foods, while the 100% recycled contents lids work equally well for hot or cold dishes.

- » Available in a variety of shapes and sizes
- » Bases made from 100% renewable & reclaimed sugarcane fiber
- » Lids made with Ingeo™ biopolymer or 100% post-consumer RPET
- » Bases & Ingeo™ lids meet ASTM standards for compostability and are BPI certified compostable
- » Bases and RPET lids are hot food friendly

## WorldView™ Naturals

Available in 2018

It's a whole new world...view. Our most popular WorldView™ shapes are now available in a natural bagasse color. We're releasing 11 naturally colored SKUs to start with, but any of our WorldView™ shapes has the potential to be produced in the natural bagasse color.

## Sugarcane Bowls

Just say no to foam, and yes to sugarcane! Also known as bagasse, this reclaimed fiber is strong, sturdy, and 100% renewable and compostable. A multitude of sizes and shapes make our bowls suited for the tiniest side portion to an individual serving, all the way up to a family style entrée.

- » Made from 100% renewable & reclaimed sugarcane fiber
- » Three shapes and many sizes to choose from
- » Select sizes available in white or natural color
- » Meet ASTM standards for compostability
- » BPI certified compostable
- » For use with hot or cold foods
- » Grease and cut resistant
- » Microwave and freezer safe

## Dahlia™ Plates & Bowls

We make this dinnerware with a premium blend of bagasse and bamboo for a unique and undeniably green look. We've designed these plates and bowls in our signature leaf shape for that extra special touch. 100% renewable, BPI certified compostable and ASTM D6868 compliant.

- » Made from 100% renewable resources - bamboo and reclaimed bagasse fiber
- » Meet ASTM standards for compostability
- » BPI certified compostable
- » For use with hot or cold foods
- » Grease and cut resistant
- » Microwave and freezer safe

∞ EP-PBS9 // ∞ EP-PBS6  
∞ EP-BLBS12

## Black Plates

These plates offer rigidity and an upscale look as well as the environmental benefits you've come to expect from Eco-Products. Pair with our matching black Vine™ cutlery for a winning combination (see page 30).

- » Meet ASTM standards for compostability
- » BPI certified compostable
- » For use with hot or cold foods
- » Freezer safe

## Wheat Straw Plates, Bowls &amp; Clamshells

Looking for dinnerware that screams green? Our brown Wheat Straw Plates, Bowls & Clamshells shout it out. Our unique biopulping process ensures these plates are thin and lightweight, but still sturdy and durable.

- » 100% renewable
- » Meet ASTM standards for compostability
- » BPI certified compostable
- » For use with hot or cold foods
- » Grease and cut resistant

## Folia™ Sugarcane Containers

The patented Folia™ line was designed to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of shapes and sizes that satisfy a broad scope of foodservice needs. It's also the recipient of the "2013 Package of the Year" award from QSR Magazine and the Foodservice Packaging Institute, as well as the "iF Packaging Design Award 2014 – Gold."

- » Made from 100% renewable and reclaimed sugarcane fiber
- » Meet ASTM standards for compostability, BPI certified compostable
- » For use with hot or cold foods
- » Microwave and freezer safe
- » Embossed to show off handy features like pull tabs, perforated flaps, cutlery nooks and sauce caddies
- » Molded, spill resistant corner flaps
- » Engineered stackability

## Plantware® Cutlery

What's white and black and green all over? Our Plantware® cutlery, of course! With undeniable environmental benefits and a rainbow of colors to choose from, this cutlery is a no-brainer choice for waste diversion. Match your decor, season, team colors or party theme without sacrificing sustainability.

- » Available in seven colors
- » Made from 100% renewable resources
- » Made with PLA, a plant-based plastic
- » Meet ASTM standards for compostability, BPI certified compostable
- » Crystallized for high heat tolerance (220°)
- » Cutlery kit is 100% compostable - wrapper and all!

Custom Pantone matching is available. Ask your rep for details.

## Vine® Cutlery

Our latest addition to the utensil party offers the same environmental benefits as Plantware®, but in a full size with classic styling. Pair with our Compostable Black Plates (page 23) for a formal, yet environmentally conscious, place setting.

- » Made from 100% renewable resources
- » Made with PLA, a plant-based plastic
- » Meet ASTM standards for compostability,
- » BPI certified compostable
- » Full 7in size and classic handle styling
- » Spoon is crystallized for higher heat tolerance (185°)
- » Napkin ring on cutlery kit is not compostable

## Regalia™ Cateringware

We're ready to party, because we're super stoked to introduce the newest additions to our catering offerings. You can't beat the convenience of drop-off catering, especially when it involves guilt-free single use servingware. Mix and match our half pans with one, two, or four compartments to serve a whole smörgåsbord of hot and cold foods. Pack it up, drop it off, and then be done.

- » Available in three compartment configurations with a common lid
- » Made from 100% renewable & reclaimed sugarcane fiber
- » Meet ASTM standards for compostability
- » BPI certified compostable

# CUSTOMIZATION:

You've carefully created a menu, chosen colors, crafted your logo, picked chairs and tables and lighting and paint. Your packaging deserves the same level of attention.

## Print & Emboss

Your food isn't generic, so why should your packaging be? You don't have to use off-the-shelf products that just anyone can use - you can build your brand with custom prints and embossing. With more than 60 customizable products, you can set yourself apart with a customized packaging suite.

Go to [ecoproducts.com/custom](https://ecoproducts.com/custom) for minimums and lead times.

CUSTOMIZATION

With 60+ customizable SKUs, every piece of your packaging can be a brand touchpoint contributing to your customers' overall experience.

Snooze needed a product for their take-out pancake flights. A flatbread pizza clamshell with a couple of tweaks did the trick - pancakes stay crisp and don't get mushy in transit. They also opted to print the top with their signature orange, adding further distinction to their packaging.

## Custom Product Development

Ready to go beyond simple custom prints and emboss? Custom shapes can fulfill your custom packaging and branding needs in ways that even print and emboss just can't. Our experienced design team can help you create a tailor-made product to serve your food with flair without sacrificing functionality.

### 1. Let's Talk

We will meet with you to better understand your goals and discover how we can develop a custom product that meets your business needs.

### 2. Let's Collaborate

A designer will hand draw some possible solutions, get your input and revise as necessary.

### 3. Let's See

Working off the sketches, our designer will create a dimensionally accurate digital model.

### 4. Let's Get Real

Using the computer renderings, we'll create a physical model using rapid prototyping technology to provide a real-life example of shape, size and user experience.

### 5. Let's Give it a Go

Once the initial design is perfected, we'll create functional samples of your product out of the actual materials. At this stage we'll test for things like strength, lid-fit and leak resistance.

### 6. Let's Wow 'Em

Once approved, we will begin production and deliver a custom package that helps you build your brand and satisfy your customers.

## Using Business as a Force for Good

### Certified

Eco-Products officially became a certified B Corp in July 2016. If you're not familiar with B Corp, think of it as a sustainability certification for businesses, similar to what organic certification is for milk, or what Fair Trade certification is for coffee. Companies who are certified B Corps have been verified by the non-profit organization B Lab to meet the highest standards of social and environmental performance, transparency, and accountability. This puts Eco-Products alongside some of the most respected sustainability-minded brands such as Patagonia, Ben & Jerry's, Seventh Generation and Etsy - just to name a few. You can find out more about B Corp by checking out their website <https://www.bcorporation.net/>

## Memberships & Partnerships

We know we can only do so much as one company, even if we're working our tails off. That's why we're active in a number of industry groups. Collaboration = bigger impact.

 <b>US Composting Council®</b>	The US Composting Council advances compost manufacturing, compost utilization, and organics recycling to benefit its members, society, and the environment.	Our leadership team is represented on the board of USCC and as president of the board of BPI.
 <b>BPI®</b>	The Biodegradable Products Institute (BPI) is a not-for-profit association of key individuals and groups from government, industry and academia. Through its innovative compostable label program, BPI educates manufacturers, legislators and consumers about the importance of scientifically based standards for compostable materials which biodegrade in large composting facilities.	
 <b>GREEN SPORTS ALLIANCE</b>	We are a founding partner of the Green Sports Alliance. The GSA leverages the cultural and market influence of sports to promote healthy, sustainable communities where people live and play. The Alliance inspires professional sports leagues, college conferences, sports governing bodies, colleges, teams, venues, their partners and millions of fans to embrace renewable energy, healthy food, recycling, water efficiency, safer chemicals and other environmentally preferable practices.	
 <b>SUSTAINABLE PACKAGING COALITION®</b>	The Sustainable Packaging Coalition® (SPC) is an industry working group dedicated to a more robust environmental vision for packaging. Through strong member support, an informed and science-based approach, supply chain collaborations and continuous outreach, they endeavor to build packaging systems that encourage economic prosperity and a sustainable flow of materials.	
 <b>FOODSERVICE PACKAGING INSTITUTE®</b>	Established in 1933, the Foodservice Packaging Institute is the trade association for the foodservice packaging industry in North America. FPI's members include raw material and machinery suppliers, packaging converters, foodservice distributors and operators/retailers.	
 <b>COLORADO ASSOCIATION FOR RECYCLING</b>	CAFR is the leading independent, non-profit organization in Colorado that is actively working to promote and encourage recycling through programs that educate the public, local governments, businesses, and Colorado's elected officials. CAFR programs are designed to provide technical assistance to those wishing to recycle and compost.	

## Third Parties are Validating our System Solutions Approach

We have long believed in and advocated for the role compostable packaging can play in diverting food scraps from landfills. With compostable packaging, the concert goer, baseball fan, or restaurant customer doesn't have to sort their uneaten sandwich crust from their plate. Putting everything in one bin makes life easier for them...and the composter. Recently, a number of reports have highlighted the potential that composting and compostable packaging can play in waste diversion.

**The Ellen MacArthur Foundation New Plastics Economy** vision for a more sustainable approach to plastics includes compostable packaging for food contact applications.

<https://newplasticseconomy.org/report-2017>

**BioCycle** published an article that quantified food scraps diverted through the use of compostable packaging. Composters got 72% more food when operators used compostable foodservice packaging. <https://www.biocycle.net/2016/08/15/compostable-products-postconsumer-food-scraps/>

According to the **SPC's "The Value of Compostable Packaging"** report, by using compostable packaging at Farm Aid 2016, the festival organizers:

1. Kept more than 19,000 pounds of food out of the landfill.
2. Prevented the release of more than 14,000 pounds of CO<sub>2</sub> from being released into the atmosphere.
3. Increased food scraps collection by an incredible 122%!

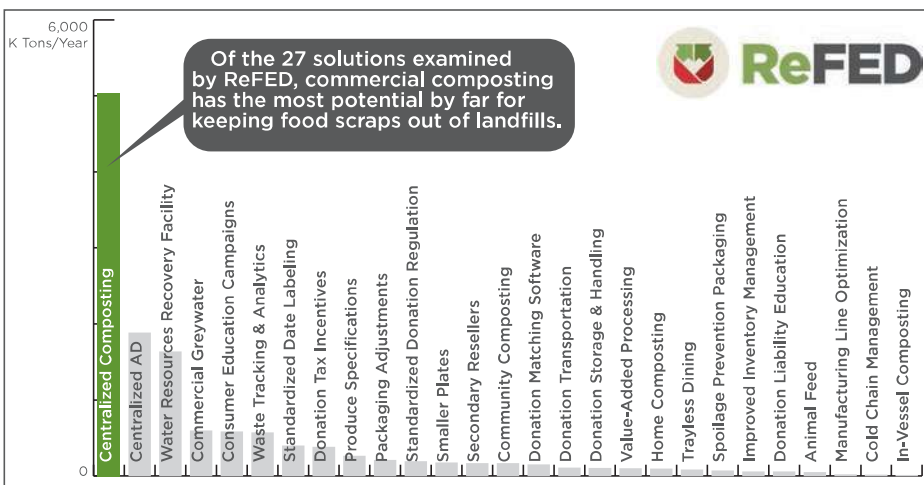

<http://greenblue.org/work/value-of-compostable-packaging/>

**ReFED** identified commercial composting as the solution with the greatest potential for keeping food scraps out of landfills. <http://www.refed.com>

"As a commercial composter, I have confidence in servicing events and venues that have partnered with Eco-Products. Their full commitment to Zero Waste means I get more food scraps with minimal contamination – and that helps my business. As an example, because Farm Aid 2016 partnered with Eco-Products, I got 121% more food scraps and only 2% contamination. Eco-Products is doing it right."

– Justen Garrity  
Founder & President  
Veteran Compost

# SERVICES:

All of our services are "Included in the Box." In other words: complimentary. Gratis. On the house. No strings attached. If you are an Eco-Products customer, we'd love to help you spread the word about your sustainability mission.

## Custom Life-Cycle Assessment

Want to know the carbon footprint of your Eco-Products? We can generate a report outlining the carbon data for the products you use. Improve your environmental program, track your numbers, and show your customers your commitment to sustainability with a customized Life-Cycle Assessment Report. Ask your sales rep or email [sustainabilitymaven@ecoproducts.com](mailto:sustainabilitymaven@ecoproducts.com)

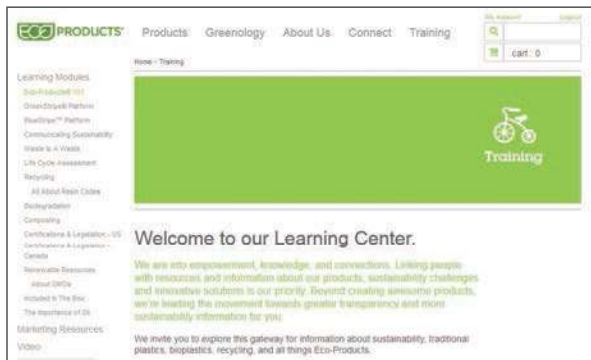

## Video Production

In the age of the viral video, there's no denying that video is a powerful communication tool. We can help you harness that power. Our in-house team can shoot, process, edit and publish your video project. Whether it's a case study to publicize your sustainability efforts or a training video for your employees, let us help. Check out our past projects on our YouTube channel: [youtube.com/user/greenisallwedo](https://youtube.com/user/greenisallwedo).

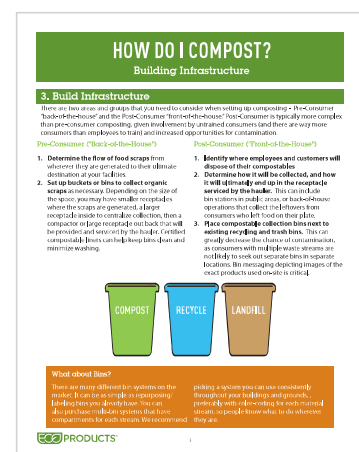

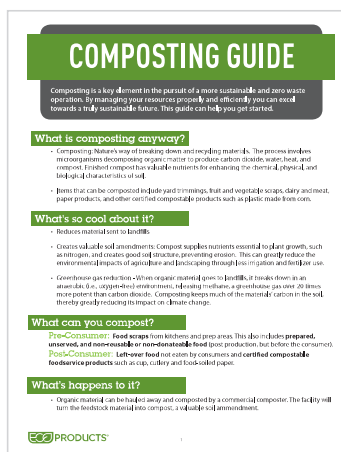

## Training

We know sustainable disposables sound like an oxymoron, and there's A LOT of information to take in if you are just getting to know us. We've created a bunch of interactive training modules and videos to help you learn more about us, our products and sustainability topics in general. Not to mention the Greenology section of our website, FAQs and download library! We also have our very own Sustainability Maven so if you ever have a question, you can just email [sustainabilitymaven@ecoproducts.com](mailto:sustainabilitymaven@ecoproducts.com)

## Zero Waste Consulting

If you're interested in waste diversion but starting a composting program or increasing your recycling rates seems daunting, fear not! We've been at this for awhile now. From little coffee shops to huge stadiums, chances are we've seen your situation before and can help you navigate the waters of haulers, composters, best bin practices and the like. Don't go at it alone, we got this. Ask your sales rep or email [sustainabilitymaven@ecoproducts.com](mailto:sustainabilitymaven@ecoproducts.com)

# 2017 Sustainability Report Summary

**2016 was a big year for Eco-Products, as well as the global push toward Zero Waste.** We saw foodservice operators around the world make commitments to advance their Zero Waste practices, US federal agencies take significant steps towards their food waste goals, and various groups issue detailed studies about the role that compostable foodservice packaging and commercial composting can play in our transition to a circular economy. To cap it all off, even more communities around the country built on the trend of requiring the use of compostable packaging.

## Why do we have a Sustainability Report?

Sustainability at Eco-Products is not a marketing campaign nor a stand-alone initiative. It is core to who we are and why we are in business.

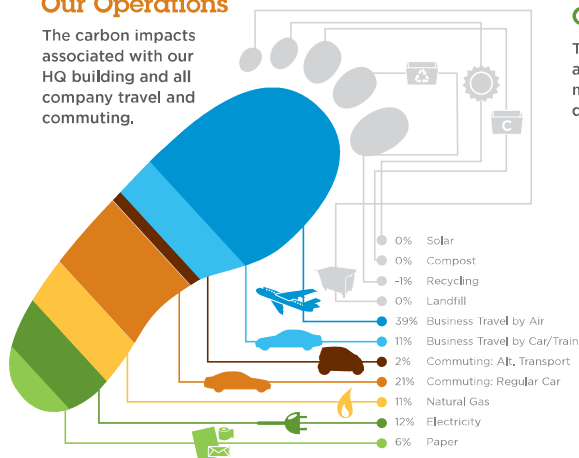

We publish our Sustainability Report because we don't feel right about calling ourselves "a green company that happens to operate in disposables" unless we make our sustainability approach, goals, successes and challenges public. Reporting holds us accountable to continuous improvement and enables us to treat sustainability just like any other important business priority.

## Looking Forward

In 2017, we are reframing our sustainability goals around four distinct categories to better reflect our priorities and our work: Zero Waste Infrastructure, Zero Waste Foodservice Operators, Products, and People. We look forward to reporting back on how we did in next year's report!

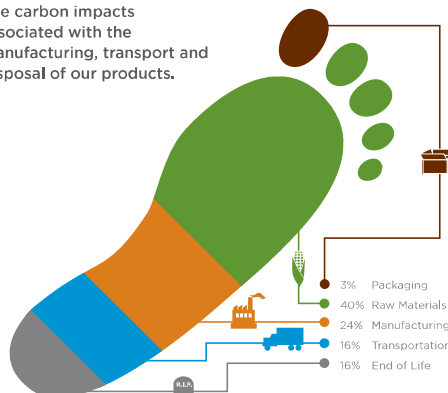

### Our Operations

The carbon impacts associated with our HQ building and all company travel and commuting.

### Our Products

The carbon impacts associated with the manufacturing, transport and disposal of our products.

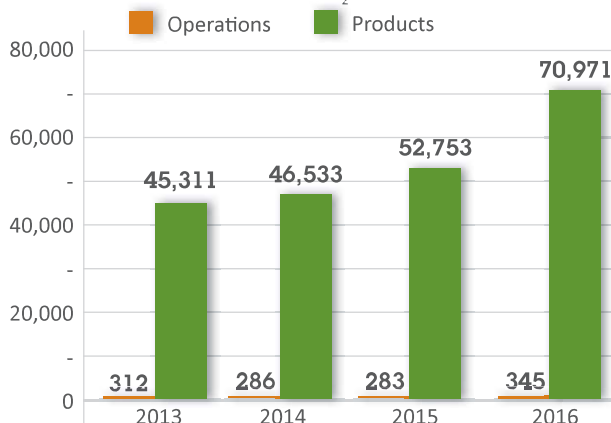

As you can see in the graph to the right, our operations contribute very little to our overall carbon footprint. We made the footprint graphs above equal in size so you can clearly read the data, but really our products are responsible for most of our carbon emissions by far. If the feet were to scale, it would look more like this:

See this little orange speck? That's our Operations footprint.

## Eco-Products Carbon Emissions

Metric Tons CO<sub>2</sub>E

Our complete Sustainability Report can be found at [ecoproducts.com](http://ecoproducts.com)

## 2016 Highlights

Continued to push for increased acceptance of food scraps and compostable packaging at composting facilities through our leadership in industry organizations such as the US Composting Council, Biodegradable Products Institute, and Foodservice Packaging Institute.

Launched our Plantware® Cutlery Kit with compostable wrapper

**19%**  
Reduced water use at our headquarters

**80%**  
Waste diversion at our Headquarters, (up from 75% in 2015)

**90%**  
Employees who included a sustainability goal in their performance review

**55%**  
Employees who took advantage of their paid day to volunteer

Became a certified B Corp

## Case Study

Four-location restaurant chain based in South Carolina, featuring salads and organic ingredients. Very dedicated to supporting their local community.

TYPE	REGION	PRODUCTS	COMPOSTING	CUSTOM
Salad Concept	4 locations 	GreenStripe® 	Yes 	Print + Signage 

### Verde, South Carolina

Verde is a four-location restaurant chain based in South Carolina, featuring salads and organic ingredients. They are “dedicated to being green inside and out” and to making it easy for their customers “to experience the benefits of eating, going, and being green.” Talk about a kindred spirit to Eco-Products!

This customer uses our GreenStripe compostable products, including custom cups and soup containers that help convey their brand using their voice. By using compostable packaging and offering compost bins in the front-of-house of their restaurants, it is easy for Verde customers to participate in waste diversion. Since very few items are not compostable or recyclable, putting the right stuff in the right bin is easy.

An especially cool aspect about our relationship with Verde is the fact that their compost hauler – Food Waste Disposal – is actually their distributor for Eco-Products. With no shortage of greenwashing when it comes to “green” foodservice packaging, FWD saw an opportunity to help its composting customers buy only truly compostable, BPI-certified products. Through a partnership with FWD, we started an innovative way to further our Zero Waste mission and support our customers’ sustainability efforts.

We’re continually adding to our list of case studies. Ask your rep if you’d like to hear more success stories!
