- 14 Tan Mini Trays
- 15 Tan Collection

**Primeware** products are made from sustainable resources; this means the raw materials used in creating these items are renewable annually.

Our products are white in color due to the use of only the highest-grade bagasse. This is a by-product of the sugarcane refining process.

Primeware also produces a line of tan color sugarcane fiber products. They also contain an additive for moisture and grease resistance. Please note that all manufacturers of molded-fiber products use a similar additive. The additive is FDA approved and does not affect the composability of the products.

### General Product Information:

- Compostable products are Certified compostable by the BPI (Biodegradable Products Institute)
- Tested using ASTM D6400 guidelines
- Meets FDA guidelines for molded-fiber food contact surfaces
- Meets Health Canada guidelines for foodservice disposables
- Microwaveable and freezer safe
- Ability to create custom items
- Can private label for large volume distributors

### PrimeWare Certifications

#### **BPI (Biodegradable Products Institute)**

The BPI certifies products as compostable only after they have been tested by the ASTM standards and have successfully met ASTM guidelines. Additionally, test results need to be submitted to a scientific review board for final approval before receiving the BPI certificate.

#### **ASTM D6400**

PrimeWare has been tested by ASTM standards, and meets their guidelines for compostable molded-fiber products. Note: ASTM does not “Certify” products, they simply create testing standards and protocol to be followed during research.

#### **USDA BioPreferred**

The BioPreferred program aims to increase the purchase and use of renewable, environmentally friendly bio based products while providing “green” jobs and new markets for farmers, manufacturers, and vendors.

#### **FDA**

PrimeWare complies with FDA guidelines for food contact surfaces.

#### **Health Canada**

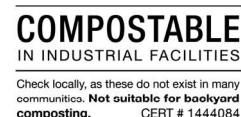

PrimeWare has received the approval of the Canadian government as safe for food contact.

#### **ISO 9001**

This certifies that the factory has been audited and meets this ISO standard for Quality Management Systems for processing, production and sale of disposable paper pulp molded products.

#### **ISO 14001**

This certifies that the factory has been audited and meets this ISO standard for Environmental Management Systems for processing production and sale of disposable paper pulp molded products.
