CUSTOMIZATION

BRINGING YOUR BRAND TO LIFE

You have spent countless hours developing your business, now let us help you customize your packaging, so it is **Recognized and Remembered!**

CUSTOM STRUCTURE

Let our Design Experts create a new structure, alter an existing stock structure, or duplicate an existing box.

CUSTOM PRINT

We can print customer-provided artwork, or our Design Experts can create and print original graphics.

PRODUCTION, CONVERTING & FINISHING

Need help deciding on the best structural elements for your carton? We offer a wide array of options.

**Clamshell & Tray Forming | Die-Cutting
Folding & Gluing | Window Film Application
Paperboard Options Ranging - .010pt to .036pt**
– in a variety of substrates

UNIQUE FINISHES

Set your artwork apart with our unique water-based finish options!

**Matte Finish | High Gloss | Pearlescent Effect
Varnish | Certain Metallic Flake**

SMALL PRINT PROGRAMS

Modest Budget, Big Brand? Check out our low minimum Small Print Program for lock-corner bakery boxes and nested food trays! Your business should be able to stand out no matter the budget.

- Choose from 4 different paperboard types: Kraft, SBS, CCNB, & CUK
- Flat & 3D PDF proofs
- Lead Time 4-6 weeks

OUR PRODUCTS

are made from various types of paperboard, corrugate, and molded fiber and are available in a variety of colors and finishes. Below are the main materials we use to produce our products.

CUK (OR CCK)

CORRUGATED

MOLDED FIBER

CUK - Coated Unbleached Kraft

Virgin paperboard that is not bleached. Has one white side that has been clay coated for durability and printability, and Kraft brown side. Also known as Clay Coated Kraft (CCK).

CRB - Coated Recycle Board

Produced with 100% recycled paperboard. Has one white side that has been clay coated for durability and printability, and an unbleached side. Also known as Clay Coated Recycle Board (CCRB).

Kraft

Made from virgin, unbleached paperboard. Brown on both sides.

SBS - Solid Bleached Sulfate

Premium paperboard produced with virgin bleached wood pulp. White on both sides. Typically clay-coated for added durability and printability.

URB - Uncoated Recycle Board

Uncoated board made from recycled paper, usually brown in color. Generally contains post consumer waste. Also known as Bending Chipboard (BC).

Molded Fiber

Made from plant-based fiber sources, molded fiber can be formed into rigid shapes combining functionality with strength.

Corrugated

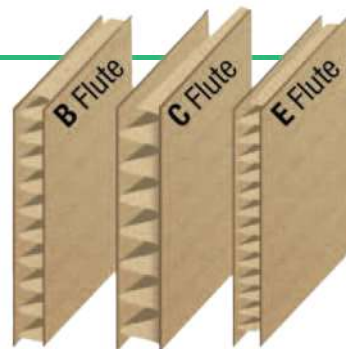

Corrugated cardboard is made up of layered arched paper created with a process called “fluting”. This material is great when strength and protection are needed.

The three most common flute profiles are: B, C, & E

B-Flute: Commonly used for pizza boxes and circles. It is a great all-around flute size for both strength and print quality. Thickness: .12 inches.

C-Flute: Typically used for cake circles and pads due to its better beam strength. It can also be used for catering totes and outer packaging boxes. Thickness: .16 inches.

E-Flute: Customarily used for small intricate items and pizza boxes that are 12 inches or smaller; however, most pizza boxes are B-Flute. Thickness: .067 inches.

UNDERSTANDING PACKAGING

KNOW the Facts

PAPER IS A PLANT

The U.S. paper industry primarily harvests trees from private working forests, owned by individuals, families, small and large businesses. In fact, many of these forests have been in families for generations!

PAPER IS INCREASING

More than 1 billion trees are planted in the U.S. each year. This means that one-third of the U.S. is forested, totaling nearly 766 million acres!

PAPER IS A RECYCLABLE

Paper and cardboard are one of the most recycled materials in the U.S. In 2023, paper recycling rate was 65-69%! This equals up to 46 million tons of paper and 33 million tons of cardboard.

PAPER IS A RESPONSIBLE

Paperboard packaging reduces waste in landfills and the working forests absorb more carbon dioxide than forestry related activities produce!

PAPER IS A FUEL

The paper industry uses every part of the tree, even the bark, which can be used to generate bioenergy. Some mills even produce more energy than they consume due to biomass energy!

Sources:
<https://www.howitunfolds.com/sustainability/do-you-know-these-facts-about-paper>
<https://www.afandpa.org/news/2023/how-paper-industry-champions-sustainable-forestry>

Recyclable

Recycling converts manufactured waste into a new use by breaking down the product into raw materials and reusing them to create something new or different. Less energy goes into creating products made from recycled materials rather than from new materials being used for the first time.**

VS.

Compostable

Composting turns organic waste into a useful product to help grow plants or act as soil amendments. Since paperboard comes from a natural source, it can be composted back into its most natural state.**

SUSTAINABILITY

OUR MATERIALS

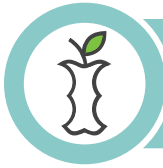

We carefully monitor the use of materials at every stage of our manufacturing process. From concept to finished goods, we create products based on the needs of your item, while keeping in mind the environmental effects of our processes and materials. We provide The Complete Package™ for you.

Solar panels on our warehouse and production facility generate enough power for 50 homes a year in Chattanooga

We connect with 1000 elementary students each year through our sustainability program Trees into Cartons, Cartons into Trees, TICCIT

Over 300 of our stock items are recognized as compostable by either CMA or BPI

We are committed to using offset inks that are vegetable-based lithographic ink and water-based flexographic inks

All our scrap paperboard is recycled to be used in new paper sources to strengthen the circular economy

All the products manufactured by our facilities are free from intentionally added PFAS

CERTIFIED

BRCGS

The BRC Global Standard for Packaging and Packaging Materials is a leading program for the certification of packaging used in food production and consumer products.

CMA

Formerly Cedar Grove, CMA and its partners work to create practical engagement models for zero waste success and certify that product can be composted in member facilities.

CTPAT

CTPAT certification means our products are low risk and increases speed for international shipping.

Custom Retail Packaging Division (Mansfield, TX)

SFI

SFI certifies that paper products are sourced responsibly by utilizing a rigorous, third-party certification audit.

ISO

The International Organization for Standardization certifies that each of our processes, systems, and procedures meet the requirements for standardization and quality assurance.

G7

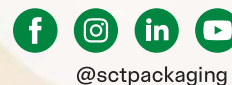

A G7 Master Printer Certification provides consistent color matching with each production run.

Visit our website for full product details and helpful tools.
