2023 Collection Catalog

Innovative Eco-Friendly Plating & Packaging

2023 VerTerra Catalog

Verterra is a leading brand in the eco-friendly dinnerware industry. Since 2007, we have been providing sustainable alternatives to traditional disposable tableware. Our product range is made from natural, biodegradable materials, making them an ideal choice for those looking to reduce their impact on the environment. Our products not only look beautiful, but they are also practical and cost-effective, providing operational efficiency and reducing labor costs. With a commitment to sustainability, Verterra has become the go-to choice for leaders and innovators in the industry.

About Us

VerTerra produces smart - sustainable - compostable - disposable dinnerware and packaging. Our products are Eco-friendly and elevate the food industry. Founded on the principle of creating a better planet, VerTerra is committed to designing sustainable products out of renewable resources like fallen palm leaves, balsa wood, and bamboo.

HOW IT ALL BEGAN

In 2005, VerTerra CEO Michael Dwork had a life-changing experience during a trip to India. He witnessed a local woman using fallen palm leaves to create all-natural plates by soaking the leaves in water and pressing them in a crude waffle iron. The plates were then used to serve traditional Indian cuisine. This innovative idea left a deep impression on Michael and sparked his desire to create a better alternative to traditional plastic and paper disposable dinnerware. The encounter inspired him to launch VerTerra, a company dedicated to providing sustainable, eco-friendly solutions.

SOCIAL RESPONSIBILITY

Through our network of factories, we actively employ over 600 women, at a time, in rural India and Indonesia. Our goal - to honor the original, hand crafted art produced traditionally and exclusively by women.

Our Balsa line is made from the leftover tree stumps from certified renewable tree farms. After the tree is felled, our team removes the stump and the other leftovers to be used as the raw material for our balsa product collection making room for new growth.

Our factories recycle the water used during the manufacturing process and mix it with the leftover leaf scrap to convert it into an organic compost to fertilize the land.

The palm leaf line is naturally pure product made from palm leaves and water. There are no glues, plastics, lacquers, veneers, or toxins used in the process.

VerTerra's line of palm leaf dinnerware, collapsible boxes, cheese boards, and serveware (patents pending) provide a wide variety of options for every customer's need. These compostable products withstand hot and cold food, are water and oil resistant, and are microwave, oven and freezer safe. VerTerra products are lightweight, durable, and are the perfect sustainable alternative for the food and beverage landscape.

AWARDS & ACCOLADES

VerTerra is proud to be an official house purveyor of the James Beard Foundation.

VerTerra is proud to be the official palm plate compostable of the National Association for Catering and Events (NACE).

<p>2015-2018 Palm Beach Food + Wine SILVER SPONSOR</p>	<p>2015 Partner of the Year NACE - NATIONAL ASSOCIATION FOR CATERING AND EVENTS</p>	<p>2014 Int's Hotel Motel Show BEST NEW PRODUCT</p>	<p>2014 NY Restaurant Show PEOPLE'S CHOICE</p>

"It is with pleasure that I share not only does The James Beard Foundation enjoy and appreciate using VerTerra at our events, but our chefs do as well. The line of plates and bowls are the perfect sizes for your special events whether they by seated dinners or walk about receptions. They are not only beautiful, and very photogenic, but sturdy as well."

Shelley Menaged, Special Events Coordinator
THE JAMES BEARD FOUNDATION

Palm Plates, Bowls & Trays

WHY PALM?

DINNERWARE FROM FALLEN LEAVES™

Dinnerware from Fallen Leaves is VerTerra's signature palm product range. VerTerra is the award-winning, leader in palm dinnerware production and the only integrated manufacturer of palm leaf plates. We own our factories which affords us the ability to produce the highest standard. Our Palm leaf products are created solely from unused, fallen palm leaves and water. Our Dinnerware is all natural and is made without any chemical coatings. The design is recognized by the Cooper Hewitt Design Museum - elegant but durable - our products are microwave and oven safe and can handle hot or cold food, liquids, and oils.

Pat. and Pat. Pending: www.verterra.com/pages/patent

SUSTAINABLE

Our dinnerware is made from fallen palm leaves (that would otherwise be burned), steam, heat and pressure. No plants or trees are cut or harmed in the process.

BIODEGRADABLE

Our dinnerware will naturally break down at home or in an industrial compost without the aid of any chemical agents.

CERTIFIED COMPOSTABLE

VerTerra products are BPI-certified compostable and tests have shown that soil containing VerTerra compost enhances plant growth by over 15%.

DURABLE + VERSATILE

Our products can withstand hot or cold food, liquids, and oils. They are naturally water and oil resistant. Verterra dinnerware will not leak, soften or impart taste.

MICROWAVE + OVEN SAFE

VerTerra dinnerware can withstand two minutes in the microwave on a high heat setting or up to 45 minutes in the oven at 350 ° F as long as they are 6" from the heat source.

sku 01-00-22B

sku 01-22-13B

Our Process

DINNERWARE FROM FALLEN LEAVES™

BORROWED FROM THE EARTH AND RETURNED

VerTerra palm dinnerware is made in our network of factories in India, where employees work in a safe environment, receive fair wages, and access to health care. The production process is simple and transparent: after collecting fallen leaves that would normally be burned, we apply steam, heat and pressure to transform the leaves into dinnerware that will compost naturally in two months.

Our priority is to be true to the Earth. We are always developing new ways to make the entire process - from gathering materials, to delivering our palm leaf dinnerware to your party - more Eco-friendly.

The first step in making our leaf dinnerware is to collect fallen leaves from plantations. Trees are not cut down during this process. The leaves are then brought into the factory, where they are sprayed with high-pressure water, steamed and UV-sterilized. As a creation of only two products, palm leaves and water, our palm leaf dinnerware is completely non-toxic and chemical free. Our dinnerware can withstand up to 2 minutes in the microwave on a high heat setting or up to 45 minutes in the oven at 350° F, as long as they are at least 6" from the heat source. Over 80% of the water used in this process is recaptured and reused. In fact, the whole manufacturing processes only requires 10% of the energy used in recycling. No chemicals, lacquers, glues, bonding agents, or other toxins are added to our compostable products, which keeps your meal and our Earth free from harm.

Pat. and Pat. Pending: www.verterra.com/pages/patent

sku 01-20-20B

sku 02-25-05C

01

Gather Leaves

Fallen Palm leaves are collected and brought to our factories in India.

02

Steam & Press

The leaves are then steamed + sterilized then they are pressed into shape.

03

Heat

The palm leaves are then heated to finish the product. They will now retain their shape.

04

Use & Enjoy

The products are ready to display culinary creations + inspire new uses.

05

Compost

The Products are BPI Certified compostable in an industrial facility or can be composted at home.

06

Back to the Earth

Soil containing VerTerra compost enhances plant growth by 15%.

WHY YOU'LL LOVE DINNERWARE FROM FALLEN LEAVES™

All-natural product made from only fallen palm leaves, steam, heat and pressure

Fallen palm leaves would otherwise be burned as waste

Certified compostable in fewer than 60 days in an industrial facility

No heat transference

BPI-certified 100% compostable

Cutlery

Cutlery Guide

WOODEN - HEAVYWEIGHT

Our efforts to create the ultimate wooden cutlery have resulted in the integration of ridging and darting techniques, aimed at improving its strength and avoiding breakage. Additionally, a proprietary confectionery glaze has been incorporated during the manufacturing process to eliminate the common issue of a wooden taste in similar products. In essence, these cutleries are not only functional, but also exhibit remarkable durability, designed to perform as if they are permanent products.

WOODEN - MEDIUM WEIGHT

We have meticulously re-engineered our original heavy weight cutlery to prioritize both affordability and performance. This has been achieved without any compromise on the quality, by reducing its weight while still retaining the proprietary baked-in glaze to eliminate the wooden taste. The result is a more budget-friendly option for those who do not require a robust line of cutlery, yet perform just as effectively as its heavier counterpart.

WOODEN - LIGHT WEIGHT

This line of cutlery offers a cost-effective and environmentally conscious solution for customers who prioritize value and sustainability. By combining numerous advantages not found in products at this price point, we have designed an exceptional value product. Rigorously manufactured to eliminate splinters and dust, it provides a remarkable value for lighter fare. However, it should be noted that this particular line does not feature the proprietary baked-in glaze or reinforcing ridging found in our other products.

WOODEN - CLICK N EAT

The Click N' Eat Wooden Cutlery Duo represents a departure from our traditional cutlery offerings. This convenient and full-sized fork and knife combination offers the ultimate culinary experience, be it outdoor or indoor dining or drop-off catering. Lightweight in design, it stacks neatly and is easily separated with a simple click. Enjoy your meal with ease, courtesy of the Click N' Eat Wooden Cutlery Duo.

Eco² Economically Eco-Friendly

Eco² Economically Eco-Friendly™

We proudly offer an eco-friendly product line that strikes a balance between affordability and style. Although these products may not be as durable as our premium line, they offer a cost-effective option for those who still want to prioritize sustainability.

PRINTED LOGO + PERSONALIZATION

For over a decade, we have been delivering high-quality custom branding solutions with incredibly low minimum requirements. Our proprietary system harnesses the power of lasers to create intricate designs, without compromising the quality of the product or the taste of your food. We elevate your branding with our special silk screen process, beautifully applied to each piece of our Balsa wood products. Our commitment to excellence extends to our facilities, which meet strict food safety standards. With a daily production capacity of 75,000 units and growing, we have the ability to fulfill even the largest orders while maintaining our strict standards of quality. Let us cover all your needs with our unbeatable combination of capacity, quality, and value.

Industry

ECO-FRIENDLY PRODUCTS FIT FOR EVERY PURPOSE + INDUSTRY

VerTerra has a vast collection of products specifically designed to be multi-purpose. The wide variety allows our products to work seamlessly with a magnitude of industries across the food and beverage landscape. Between the palm leaf dinnerware, space saving collapsible boxes, chef boards, and serveware, VerTerra has a product for every need.

FAST CASUAL

Our product range fits the need of many QSR and Fast Casual Concepts. Our line of fast casual items are the solution for an affordable and aesthetically pleasing customer experience. Whether your focus is organic, locally sourced, farm to table or another innovative food concept, match your plating and packaging with your food all while driving home the message of sustainability to your clients.

HOTELS

Create the perfect ambience in-room, poolside, at events, or as an amenity with our products. VerTerra is the answer to maintaining a high standard of guest experience with significantly lower cost. Our products perform and feel like permanent versions with the convenience of single-use: eliminate “slippage”, breakage, loss, and keep your costs in line with your usage. In addition, save man power, prep/clean up, and storage all while maintaining your environmental goals.

TASTINGS

Our minis have become the tasting industry standard with over 500+ major events using our products, such as: Aspen F&W, Feast Portland, Palm Beach Food and Wine, and more. Our "smalls" the 2.5", 3", 3.5", 4", and 6" products make it easy for you to run a compostable event, lowering staffing needs, and the added bonus of gorgeous food images. Our smalls will showcase the food and your event in the best light.

"The first time I saw Verterra, I knew I had found something very special. Not only a sexy, modern, creative option for events. But really a break through in the availability to offer a product that you could feel good about using. In today's world where the importance of taking care of our environment is paramount....Verterra is leading the way with its unique and beautiful products! BRAVO! "
