Compostable Products

SPRING/SUMMER 2020

We Exist to be of Service to People and the Planet

We envision a thriving world where everyone's basic needs are met with a beneficial impact on the environment.

The Importance of Compostables

More than 26 million tons of plastic are sent to U.S. landfills each year. Products made from plants, not petroleum, conserve oil resources and support cleaner production methods while protecting the health of our planet and diverting waste from the landfill.

We are one of the few companies in the U.S. to sell only plant-based, certified compostable products while striving to be a model of sustainability and generosity. Since 2009, we have given at least 25% of our net profits annually to grassroots social and environmental organizations as well as offered discounts to schools and non-profits. We also offset our carbon emissions from

raw material to delivery. In 2010 we became a Certified B Corporation, and in 2013 converted our legal structure to a California Benefit Corporation, demonstrating our continued commitment to make a positive impact on society and the environment.

Our Promise

Our products are designed for performance, strength and aesthetic. Our claims are third party verified and we regularly audit outsourced factories under Fair Labor Organization guidelines to ensure fair wages and working conditions.

Partners

We're passionate about collaborating with businesses and organizations to pioneer innovative approaches to environmental challenges. By partnering with our customers, we hope to inspire others to shift their behavior around consumption and waste.

Our Social and Environmental Responsibility Efforts

25% OF
PROFITS

Devoting 25% of Profits

To grassroots social and environmental organizations and to offset our carbon emissions from raw material to delivery.

100%
CARBON
OFFSETS

Zero Carbon Footprint

Through our offsets and use of renewable energy to power our office.

ZERO
WASTE

Zero Waste

We strive to be a zero waste office by reducing our consumption and diverting waste to compost and recycling.

100%
COMPOSTABLE

100% Compostable Products

All of our products are designed to be completely compostable in a commercial compost facility.

OUR GIVING

2019 Impact Giving

World Centric donates 25% of our profits to global grassroots social and environmental programs and to offset our carbon emissions from raw material to delivery. Below are our giving numbers from the 2019 profits. This amount will be distributed to multiple projects throughout 2020.

FEATURED IMPACT STORY

SOIL Haiti

Photos courtesy of SOIL

Since 2006, SOIL has been transforming waste into resources in Haiti.

Sanitation

The world is experiencing an unprecedented sanitation crisis with more than half of the world's population lacking access to a toilet that safely manages human waste, according to the United Nations. In Haiti, where there is no central sewage system, only 30% of the population has access to improved sanitation and less than 1% of wastes are safely treated.

Since 2006, SOIL has been transforming waste into resources in Haiti. They provide full-cycle sanitation services from containment to reuse by taking a circular economy approach. For a small fee, households can subscribe to their service that includes a toilet with removable bucket that is picked up regularly, worked and turned into compost to sell for plant cultivation.

Through the use of ecological sanitation, SOIL is working to create a revolutionary social business model for providing access to safe, dignified sanitation that produces rich, organic compost as a natural resource for Haiti's badly-depleted soils, while also creating economic opportunities in some of the world's most under-resourced communities.

As cities expand at staggering rates, it's critical that the sanitation sector develops innovative approaches that work in dense urban areas to avoid exacerbating the toll of preventable waterborne diseases. Through their program, they are demonstrating that it's possible to provide safe, affordable sanitation access to people living in the world's most vulnerable urban communities. To learn more or make a donation, visit oursoil.org.

Turn a new leaf with molded fiber products containing no added PFAS from World Centric

Introducing the collection of molded fiber products from World Centric that use bio-based, 100% compostable barriers as alternatives to Per- and polyfluoroalkyl substances (PFAS).

Made from unbleached plant fiber, these products are microwave friendly, freezer safe and offer moisture resistance for a variety of hot and cold foods. Best of all, they are designed to compost within 2 to 4 months in a commercial composting facility.*

Please note: These items provide moisture and grease resistance but are not grease proof and may not work with very oily and greasy foods. For more information, contact your sales representative.

- Made from unbleached plant fiber such as sugarcane, bamboo or wheat straw
- Lining made from PLA which provides a plant-based grease and moisture barrier
- Conforms to ASTM D6400 and D6868 standards for compostability
- Composts in 2-4 months in a commercial composting facility*

*Conforms to ASTM D6400 and D6868 standards for compostability. Commercial composting facilities may not exist in your area.

World Centric will be gradually expanding this line of products and performance capabilities, so look for the leaf on cartons of additional molded fiber products in the months to come.

FIBER PLATES, SOUFFLÉ CUPS & PIZZAROUND™ CONTAINERS

Leftover material from agriculture can be used as an alternative to tree-based paper products. After crop processing, the residue is most often burned. At World Centric we see this agricultural fiber as a valuable resource to make products like plates, take-out containers, bowls and other compostables.

A person wearing a black and white striped apron is holding a white fiber tray filled with vegetables. The tray contains a row of cherry tomatoes, a portion of broccoli, a slice of cucumber, and a row of baby carrots. In the background, a grocery store produce section is visible with various vegetables like spinach and more carrots on display. A person in a white shirt is also visible in the background, reaching for a vegetable.

FIBER MEAT & PRODUCE TRAYS, SCHOOL TRAYS AND COMPOST-A-PAK®

Our Trays and Compost-A-Paks are made from unbleached plant fiber, an annually renewable resource and like all of our fiber products, are gluten free. They are the perfect alternative to polystyrene containers as they are non-polluting and certified compostable.

* MOQ is higher for 4 color artwork.

CUSTOM PRINT FIBER PRODUCTS

Fiber Products

Custom printing is available for many of our fiber products, including bowls, containers, COMPOST-A-PAK and clamshells. For pricing, MOQ's and lead times, please consult your sales representative or contact insidesales@worldcentric.com.

Important Information and FAQs

- Artwork is designed by the customer, World Centric does not provide design services or suggestions
- All art must be in outlined vector format, .eps, .ai or hi-res .pdf file
- All fonts must be outlined and spot colors specified
- All proofs are digital, printed samples are not provided
- Lead time starts when we have received a purchase order
- World Centric is unable to stock or carry inventory on custom prints. Orders will ship in full to customer upon time of arrival.
- World Centric reserves the right to refuse any custom print order if we deem the graphics, logo, product or company are inconsistent with our values
- Email insidesales@worldcentric.com or your sales representative for more details

World Centric is a Best for the World Honoree

As a Certified B Corporation, World Centric joins over 3,000 companies committed to a higher standard of transparency, accountability, and performance. Being part of the B Corp community means we harness the power of business to solve social and economic problems.

Each yearly recertification is a rigorous evaluation process determining that we have met comprehensive performance standards for our workers, community, governance and environment.

In September 2019, B Corp selected World Centric as a Best For The World Honoree, which means that our certification score is in the top 10% of B Corps worldwide. World Centric was selected in the Overall, Changemaker, and Governance categories. We rated high for our mission and engagement, corporate accountability, ethics, transparency, and articles of incorporation that state social and environmental purpose. Learn more at bcorporation.net.

Integrity

We are ethical and honest in all we do

Community

We act in service to each other and all life

Excellence

We strive to do our best now and continuously improve

Memberships and partnerships

1% for the Planet is a global network of businesses that donate 1% of annual sales directly to approved environmental and sustainability nonprofit organizations.

We work with Post Landfill Action Network (PLAN), the global movement of college and university student leaders who help launch programs to fight the cycle of campus waste.

We partner with Rubicon Global to find cost savings across waste streams and to develop innovative ways to reduce, reuse and recycle materials.

Green America certifies businesses that are committed to using business as a platform for social change. Green businesses show leadership in their industry by embedding social responsibility into the DNA of their company.

The National Minority Supplier Development Council Inc® (NMSDC®) is the global leader in advancing business opportunities for Asian, Black, Hispanic and Native American suppliers in the corporate supply chain.

Our Third Party Verifications

We take our efforts to create a better world seriously. We test our products using the American Society for Testing and Materials (ASTM) standards to ensure they break down in commercial composting facilities. This is verified by the following third-party organizations.

Biodegradable Products Institute (BPI)

BPI is a third-party organization that reviews and certifies compostable products that meet ASTM D6400 and ASTM D6868 conditions for compostability. To learn more about BPI, please visit bpiworld.com.

TÜV AUSTRIA

TUV Austria is a third-party organization that reviews and certifies compostable products. Our TÜV certifications include OK Compost Home for our PLA bags and OK Industrial Compost for our fiber containers. For more information, visit tuv-at.be.

USDA BioPreferred Products

The USDA Biobased Product label indicates that a product has been independently certified to meet USDA BioPreferred program standards for biobased content. Biobased products are composed either partly or entirely of renewable plant materials. Visit biopreferred.gov to learn more.

Compost Manufacturing Alliance (CMA)

CMA is a third-party organization that utilizes a nationwide partnership of compost manufacturing facilities to provide field disintegration testing for food service products. To learn more about CMA, visit compostmanufacturingalliance.com.

Forest Stewardship Council (FSC®)

FSC® certification is a market-based tool that supports responsible forest management worldwide. FSC certified forest products are verified from the forest of origin through the supply chain. The FSC label ensures that the forest products used are from responsibly harvested and verified sources. Visit fsc.org for more information.

Gluten Testing

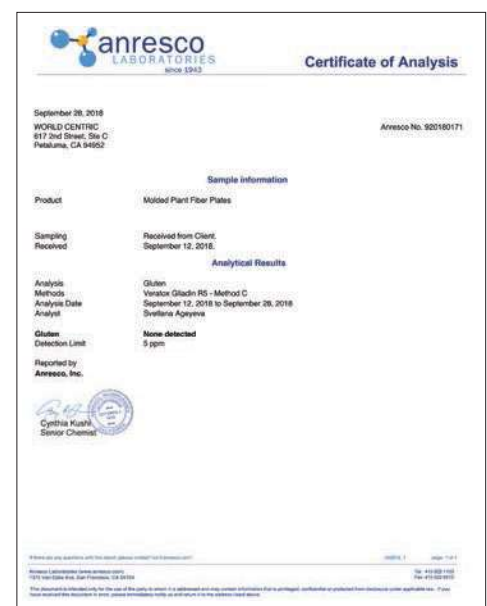

Our fiber plates have been tested by Anresco Laboratories, an independent facility for the measurement of cereal gluten at low levels, nominally within a range of 5-80 PPM, both in our raw materials and finished food products. Analytical Results: Wheat Straw Plates: <5 ppm

For a complete list of third-party reports and test results including fair labor audits, food safety audits, and product testing, please visit worldcentric.com/reports.

BPI Item Category	Certificate
White cutlery, bowls and plates with a max. thickness of 2.68 mm made from a BPI approved resin	#1918104-3
Natural colored bags with green printing, max. thickness of 143 microns (5.6 mils)	#1918104-10
White colored hot drink lids with a maximum thickness of 0.37 mm, made from BPI-approved resin	#1918104-12
Double Wall Hot Cups & Bowls and PLA lids	#1918104-15
Paper Hot and Cold Cups	#1918104-17
PLA Single Layer Kraft Cups - Printed 0.58 mm	#1918104-19
NoTree Paper Hot Cups & Bowls 400 microns	#1918104-21

TÜV Item Category	Certificate
Bags for collection of biodegradable refuse	TA8021802517
Unbleached bagasse molded fiber tableware	TA8012004198

USDA Item Category	Percentage
PLA/TPLA Cutlery: Forks, Knives, Spoons, Sporks	96% BioBased
Ingeo PLA Clamshells, Deli Containers, Cold Cups, Straws, Lids	100% BioBased
Plant Fiber Clamshells, Plates, Bowls, Trays	100% BioBased
Paper/PLA Hot Cups and Soup Bowls	100% BioBased

Three Great Reasons to Use Our Products

1. Sustainable Materials

Our products are made from annually renewable plants like sugarcane, bamboo and wheat instead of non-renewable petroleum (plastics and polystyrene).

2. Reduce Waste

Plastic and polystyrene are derived from petroleum and create pollution and toxicity during production, use and disposal. Compostables come from plants. They reduce waste going into landfills, biodegrade in a commercial composting system and produce nutrient-rich soil in 3-6 months, while plastics and polystyrene persist for hundreds of years in the environment.

3. Use Less Energy

Our products require less energy to produce than petroleum-based products and reduce greenhouse emissions, lessening the impact of global warming.

Our Eco-Profile Analysis

This graphic shows the results of our eco-profile analysis which measured the energy and other inputs required to make a product, from the extraction or harvesting of raw materials to the finished product at the factory gate.

Compostable Products Materials Chart

	Material	Sourcing	Products	Heat Resistance	Time to Compost*
	Molded Plant Fiber and Paper	Sugarcane, bamboo or wheat straw	Fiber plates, bowls, containers, clamshells, pans and trays; NoTree paper cups and bowls	Suitable for foods up to 200° F	2-4 months
	FSC®/SFI® Paper	FSC®, SFI® paper from responsible sources	Paper hot cups, bowls, paper straws	Suitable for liquids up to 220° F	1-3 months
	Recycled Paper	Post-consumer waste recycled paper	Sleeves for cups and containers, napkins and towels	N/A	1-2 months
	Ingeo™ PLA	PLA (polylactic acid) comes from plant sugars grown in the U.S.	Cold cups, lids, straws, clear deli containers, salad bowls	Suitable for liquids up to 120° F	2-4 months
	TPLA	TPLA sourced from non-GMO plant sugars grown in China with Talc added	Cutlery, ZeroWare reusable dishware	Suitable for foods up to 180° F	3-6 months

*Composting estimates are based on a commercial composting facility

OUR PRODUCTS ARE RESPONSIBLE FROM START TO FINISH

Conform to ASTM D-6400/D-6868 Standards; Compost in 2-6 months in a Commercial Composting System.

Fiber Plates, Bowls, Trays and Clamshells

- Made from unbleached plant fiber such as sugarcane, bamboo or wheat straw
- No wax or plastic lining
- Freezer safe
- Gluten free
- Conform to FDA guidelines for food use

PLA and TPLA (70% PLA and 30% Talc) Utensils

- Made from non-GMO plant starch and talc
- Conform to FDA guidelines for food use

Paper Hot Cups & Bowls with Bio Lining

- NoTree™ cups made from paper sourced from rapidly renewable fibers such as sugarcane or bamboo
- Traditional, kraft and double wall hot cups made from FSC® or SFI® certified paper
- Compostable bio-based lining
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers, Straws, Lids

- Made from Ingeo PLA, derived from plants grown in the U.S.
- Conform to FDA guidelines for food use

Trash, Produce and Yard Waste Bags

- Made from synthetic and starch-based plastics
- Certified OK Compost Home by TÜV AUSTRIA
