Marketplace. See story on page 6.*

For People And The Planet

This year marks the 17th anniversary for World Centric, and a pivotal moment for the company and the world. The planet's ecological systems continue to be extremely stressed due to human activities, and the cycle of poverty is exacerbated even further by the pandemic and economic inequities.

Companies need to make a difference by working to provide for basic necessities like food, water, sanitation, education, healthcare and more. They also need to effect environmental change, especially in communities where resources aren't available to mitigate environmental degradation.

Today, just like 17 years ago, we continue to uphold the same mission and values to be of service to people and the planet in all that we do, and elevate awareness of global sustainability issues.

Looking ahead, World Centric is committed to innovating compostable, plant-based materials and packaging to help reduce the environmental impact of the foodservice industry on the planet.

FEATURED IMPACT PROJECT
WINGS Guatemala

Above: A young Guatemalan girl. Opposite: A WINGS representative gives out information to community members. Photos courtesy of WINGS Guatemala.

Increased access to family planning methods has been linked to better nutritional outcomes, increased educational attainment for girls, decreased migration, and decreased environmental implications. When women control their own pace of reproduction, they are able to make decisions to pursue education, join the workforce and delay marriage if desired.

ALLOCATION: \$37,195 | FISCAL YEAR 2020

Reproductive Health Services, Guatemala

Founded in 2001, WINGS Guatemala provides quality reproductive health education and services to underserved, primarily rural Guatemalan youth, women, and men.

Healthcare

In Guatemala, 47% of children under five are chronically malnourished (80% in Indigenous populations) and 80% of the Indigenous population lives in poverty.

Providing reproductive health services is fundamental to breaking the cycles of poverty and inequality that are present in Guatemala. Without the ability to plan and space pregnancies, families are often unable to meet the basic needs of all their family members.

Approach

Working in 14 predominantly rural, indigenous, and underserved provinces in Guatemala, WINGS takes a holistic approach to reproductive health and collaborates with local partners to implement the following activities:

- Youth Peer Education Program - Training youth leaders to provide accurate reproductive health information and service referrals to their peers.
- Volunteer Promoter Network
- Reproductive Health Clinics
- Mobile Surgical Clinics

World Centric provided 3.2% of the total cost for WINGS reproductive health services in 2021. Their programs will provide tubal ligations, vasectomies, birth control and emergency contraception to rural Guatemalans.

For more information or to make a donation, visit wingsguate.org.

STAFF GIVING PROJECTS
La Cocina and WILD COAST

Chef Nafy Ba Flatley, second from right along with fellow restaurateurs of La Cocina's Marketplace. Photo by Erin Ng.

Each year World Centric provides funds for employees to donate to worthy organizations. A small group of employees vets non-profits for the team to support, and regional salespeople vet organizations in their local areas. Here are two of the organizations staff supported with 2020 profits.

Donation to support low-income and immigrant women entrepreneurs

ALLOCATION: \$3,400 | FISCAL YEAR: 2020

Financial Assistance

La Cocina, or “The Kitchen” in Spanish, is a nonprofit in San Francisco’s Mission District working to solve problems of equity in business ownership for women, immigrants and people of color.

Working class women-of-color and immigrant women, many of whom are skilled cooks, have traditionally been excluded from the formal job market in the foodservice industry. In the U.S., women account for only 33% of business owners nationwide and still make just 46-75 cents for every dollar their white, male counterparts.

This is where La Cocina comes in. La Cocina provides low-income and immigrant women food entrepreneurs with affordable commercial kitchen space, industry-specific technical assistance, access to market

opportunities, and other resources needed to survive the crucial start-up phase of a foodservice operation. The La Cocina incubator kitchen is home to more than 40 up-and-coming businesses that represent dozens of diverse cultures through food.

In the spring of 2021, La Cocina opened the Municipal Marketplace - a 7,000 square foot food hall in the Tenderloin that houses seven women-owned businesses.

One entrepreneur in La Cocina’s marketplace is Nafy Ba Flatley, founder of Teranga (which means hospitality in Wolof, her native Senegalese language). Nafy started her career in marketing in San Francisco, but found an increasing passion in raising three kids on the flavorful, healthy food of her childhood. Her Senegalese village was built around a baobab tree, and Nafy remembered drinking the bright, refreshing bissap baobab as a child. She now bottles the energizing drink and makes delicious Pan-African meals.

The Marketplace provides economic opportunity for La Cocina entrepreneurs, a welcoming space, jobs for the community, and delicious and affordable food.

Learn more and support them at lacocinasf.org.

Donation to support ongoing coastal protection efforts

ALLOCATION: \$10,000 | FISCAL YEAR: 2020

Conservation

WILD COAST is an international organization working with communities to conserve and protect coastal and marine ecosystems in California and Mexico.

In Mexico, WILD COAST has a project capturing and recycling plastic waste from the Tijuana River before it ends up in the ocean. They installed a “trash boom” along the river which acts as a physical barrier to capture trash and prevent it from moving further downstream while allowing the water to continue flowing. Since January, WILD COAST’s boom has captured over 10,000 pounds of plastic waste. They are able to recycle 93% of what is captured.

“As all of that water moves through the canyons predominantly in Mexico, it is being carried to the Tijuana River which empties directly into the southernmost marine protected area in California,” explains Lisa Gilfillan, Ocean Conservation & Education Coordinator.

Now, WILD COAST is working with community members in the canyon to reduce pollution. Border Coordinator Rosario Norzagaray organizes recycling events with

WILD COAST installed a “trash boom” along the Tijuana River to capture and recycle plastic waste. Photo courtesy of WILD COAST.

ECOCE, another civil organization, where people are able to exchange plastic waste for foods such as rice, beans, milk, and juice.

And the recently implemented collection points in the Los Laureles neighborhood allow people to participate directly in the recycling campaigns, collecting over 800 pounds of plastic in a single month.

Learn more and get involved at wildcoast.org.

NEW NOTREE® PAPER TAKEOUT CONTAINERS AND FRY CUPS

World Centric is proud to introduce eleven innovative new NoTree® paper containers and fry cups to its tree-free, bio-based and compostable collection. The expanded NoTree items provide more sustainable packaging alternatives to operators.

World Centric's line of NoTree® hot cups, cold cups, and bowls is growing! The 100% compostable* solution that doesn't involve cutting down trees and using petroleum plastic linings is now expanding into a full range of packaging and sizes to support your carryout and delivery needs while supporting your sustainability objectives. Plus all of our cups, bowls and containers are customizable with our custom printing program. See page 38 for more details.

*New NoTree items meet ASTM D6400/D6868 standards for compostability in commercial composting facilities. BPI certification pending.

FIBER CLAMSHELLS, CONTAINERS, COMPOST-A-PAK® & SOUFFLÉ CUPS

Bamboo, sugarcane bagasse and wheat straw fibers can be used to make sustainable alternatives to polystyrene and plastic tableware. Some of these materials are considered residue after crop processing and are often burned. World Centric sees these fibers as a valuable resource to make products like plates, take-out containers, bowls, and other compostables.

*Suitable for cold items only

A man with a beard and blue eyes, wearing a blue patterned shirt, is smiling and holding a white NoTree cold cup with a straw. The cup has a blue band and the NoTree logo. The background is a blurred outdoor setting with green plants.

NOTREE® COLD CUPS, LIDS & STRAWS

Our NoTree® cold cups are the sustainable replacement for clear plastic cups or plastic-lined paper cups, which aren't compostable or recyclable. NoTree cups have a bio-based lining inside and out to make them leak proof and are certified compostable where facilities exist.

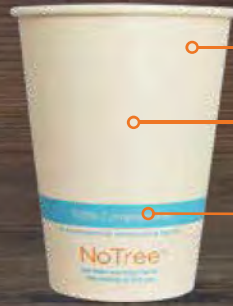

COLD CUPS

22 oz

16 oz

12 oz

Made from bamboo paper with no bleaching

Bio-based lining inside and out prevents leaking and condensation accumulation

Certified commercially compostable (where facilities are available)

NOTREE® PAPER HOT CUPS AND LIDS

Our NoTree® cups and bowls are made from crop residues and alternative fibers like sugarcane bagasse and bamboo fiber as an alternative to tree fiber. NoTree products are sturdy and have a bio-based lining to make them leak proof. They are the perfect alternative to traditional paper and polystyrene cups and bowls.

HOT CUPS

NoTree® hot cups and are made from unbleached bamboo fiber with a plant based bio-lining, not petroleum, which makes them compostable in a commercial composting facility where available.

FIBER CUTLERY AND LARGE SERVING UTENSILS

World Centric is proud to bring you a new generation of cutlery made from unbleached bamboo, sugarcane and wheat straw plant fibers, not plastic. From spoons, forks and knives, to serving utensils and even sporks, our durable, fully compostable fiber cutlery is the most sustainable answer to providing serving and eating utensils when only a plastic free solution will do for your guests.

World Centric FIBER CUTLERY

Unique design sustainably made by World Centric

Compostable in a commercial compost facility*

Innovative, lightweight and durable design

Helps reduce unrecyclable plastic in the environment

Our new cutlery is made from unbleached plant fiber, not plastic. From spoons, forks and knives, to serving utensils and even sporks, our durable, fully compostable fiber cutlery is the most sustainable disposable cutlery on the market. Along with our TPLA cutlery made from plant-based plastic, our fiber cutlery lessens our impact on the environment and gives our customers one more alternative to regular petroleum based plastic cutlery which is not compostable or recyclable.

How does World Centric fiber cutlery compare to plastic cutlery?

	World Centric Fiber Cutlery	Plastic Cutlery
 Material	Made of renewable plant fibers from sugarcane bagasse and fast-growing bamboo	Made of non-renewable fossil fuels such as petroleum oil and natural gas
 Planet Health	Made of plants that absorb carbon while growing	Plastics manufacturing negatively affects air quality, public health, and the climate
 End of Life	Commercially compostable, even with food residue *	Recycling is unlikely due to size and contamination with food residue

A top-down view of several white compostable cutlery items, including forks, knives, and spoons, scattered on a light-colored wooden table. In the top left corner, a white plate holds several slices of lemons. The background is a warm, natural wood grain. An orange horizontal band is positioned across the middle of the image, containing the main title. A dark green rectangular box is located on the left side, containing descriptive text.

BULK AND WRAPPED COMPOSTABLE PLA AND TPLA CUTLERY

World Centric® offers a complete range of certified compostable cutlery made from plant-based plastic, not petroleum. Our certified compostable cutlery is available individually wrapped, in assorted kits, or in bulk. World Centric PLA and TPLA utensils compost within 3 to 6 months in a commercial composting facility where available.* The teardrop-shaped opening in the handle of our cutlery is a trademark of World Centric.

PLA CUPS, LIDS, SALAD BOWLS AND CLEAR CONTAINERS

PLA (polylactic acid) products are made from plant sugars which are turned into lactic acid through fermentation, then converted into a polymer. Manufacturing PLA produces 75% fewer greenhouse gases and uses 50% less non-renewable energy compared to conventional plastics made from petroleum.

Founded in a Marin County garage in 1995, Equator Coffees is a high impact coffee company focused on quality, sustainability and social responsibility. With nine cafes and thousands of cups served, their impact has grown but their values remain the same, to make people's lives better through coffee.

CUSTOM PRINTING PRODUCTS & DETAILS

Stand out from your competitors and make a stand for sustainability by imprinting your logo on compostable paper cups, bowls, straws, sleeves and fiber items. Please contact your sales representative or email insidesales@worldcentric.com for product availability, pricing, MOQ's and lead times, which vary by item.

CUSTOM PRINT FIBER PRODUCTS

Custom printing is available for many of our fiber products including plates, bowls, containers, COMPOST-A-PAKS and clamshells. For details including pricing, MOQ's and lead times, please contact your sales representative or email: insidesales@worldcentric.com.

CUSTOM PRINTING PROCESS

Important Information and FAQs

- All artwork, fonts, and spot colors are to be supplied by the customer, World Centric does not provide design services
- All proofs are digital, printed samples are not provided
- Lead time starts once we have received a purchase order
- World Centric is unable to stock or carry inventory on custom prints. Orders will ship in full to customer upon time of arrival
- World Centric reserves the right to refuse any custom print order if we deem the graphics, logo, product or company are inconsistent with our values
- Email insidesales@worldcentric.com or your sales representative for more details

CUSTOM DESIGN STUDIO

Brand Expressions

Create recognizable brand expressions that stand out

We collaborate with you to design leading edge solutions that meet your specific needs and reduce environmental impact. We do this by merging plant based materials with exceptional product design, engineering and manufacturing processes from the beginning, to the end of your product's life.

Research, Discovery & Concepting

World Centric designs and manufactures a variety of custom products for the Consumer Packaged Goods industry. Our team of

designers and product developers will work with you to develop sustainable and ownable packaging solutions.

Design, Prototyping, & Testing

The development of approvable physical samples is a key step in our process. We work with a variety of materials, processes,

and high quality factories to realize your ideas quickly.

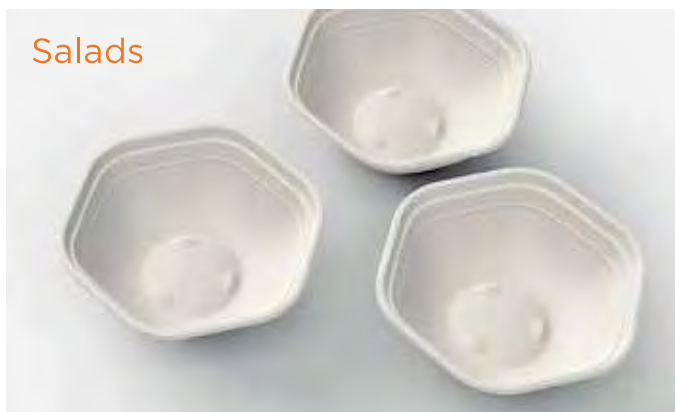

Manufacturing & Logistics Management

Our operations team can quickly bring your designs into production and delivered around the world. As a certified B Corp and member of the 1% For the Planet network, we follow our principles across our entire supply chain, logistics, and quality programs.

We have worked with nationwide brands to create sustainable and iconic packaging. Partnering with creative and operational teams, we help realize their brand vision; from conceptualizing and visualization to prototyping and manufacturing.

Case Studies

Salads

A young, nationwide salad and healthy bowl brand was looking to reduce waste and introduce sustainable materials into their growing business.

Working closely with their creative team, our compostable materials enabled the creation of new shapes and forms, not possible with traditional manufacturing processes. These iconic forms have delighted customers and established a strong social media presence.

Noodles

A California based fresh noodle take-out chain needed help improving their existing product to be more sustainable, compostable, and usable.

Our custom lid solution combined with an easy to hold bowl shape, provided a simple and elegant way to ease preparation, maintain freshness and resulted in a truly enjoyable quick noodle experience.

CONSUMER PRODUCT GOODS

Iconic Sustainability

We can help you create sustainable and ownable brand expressions that set your product apart.

Our team of designers and product developers can work with you to develop unique CPG solutions.

Big Hearted Roast

Cambio Coffee Roasters provides small-batch roasted coffees in an easy-peel eco-friendly pod. We provided Design for Manufacturing (DFM) services for their team to ensure the design could be easily produced while providing secure lid fit, stacking, and separation features.

Health & Beauty

Our eco-friendly and highly moldable materials can protect and display a wide variety of product types and shapes. Our custom designed inserts and secondary packaging help reinforce the sustainable attributes of your product.

Wine Packaging

Headquartered in Sonoma County, World Centric is uniquely situated next to some of the world's greatest vineyards. Our expertise in molded fiber provides an ideal packaging solution for glass and other beverage products.

Retail Packaging

We offer customized solutions for retail and online channels. Iconic and sustainable forms are designed around your products to help stand out in your social media streams.

Kale Caesar Salad w/ Vegan Ranch Dressing + ROASTED CHICKPEAS

A V+B classic and favorite. Kale is loaded with powerful antioxidants and is one of the most nutrient-dense foods on the planet. We add our signature croutons for an added crunch and dose of protein.

Ingredients

Kale, Chickpeas (Cristoforo), Cacao Powder, Smoked Paprika, Onion Powder, Himalayan Sea Salt, Olive Oil, Apple Cider Vinegar, Lemon Juice, Garlic, Cashews, Pumpkin Seeds, Sunflower Seeds, Olive Oil, Agave, Salt, Pepper

World Centric Customer + Composter Success Story

Our society has an urgent need for more widespread commercial composting facilities to keep food waste out of landfills, where it does harm to the environment by releasing methane, one of the most potent greenhouse gases. Across North America, many restaurants are discovering small-scale community composters that are stepping up to help local residents and foodservice operators reduce their waste.

Vegetable and Butcher partners with Compost Cab to divert compostable packaging from landfill

Ariane Valle (the vegan) met Turner Hoff (the paleo), and in 2016 V+B was born. A subscription-based service, V+B delivers chef designed, dietitian approved, prepared meals throughout Washington D.C.

“We started V+B because we were tired of mediocre food that was marginally healthy, tired of yo-yo’ing between diets that were difficult to sustain, and most importantly, tired of the single-use plastics and plastic packaging that are destroying our planet,” explain Ariane and Turner. “We knew we could do better.”

Ariane Valle and Turner Hoff of Vegetable and Butcher

V+B’s mission is to help people reestablish a meaningful connection with food that is sourced with the seasons, and prepared with complete transparency.

“One of our core values is being kind to the earth, which is why we use World Centric compostable containers plus reusable bags and ice packs for all of our meal deliveries,” explain Ariane and Turner. “From the farmers of our ingredients to the suppliers of our compostable packaging, we work hard to establish lasting relationships with people who share our values and care about the environmental impacts of their businesses.”

V+B uses only compostable foodservice ware from World Centric. Customers can request a compostable bag every Monday with their meal delivery, fill it up with containers, lids and sleeves, and give it back the following week. All packaging is diverted and composted by Compost Cab. In March 2021, V+B composted 11,388 meal containers, saving 1,196 pounds of packaging waste from the landfill.

V+B also partners with Food Rescue and Food Not Bombs to minimize food waste and donate meals to those in need. In the same month, V+B donated 1,172 meals, preventing 952 pounds of food waste. Learn more at vegetableandbutcher.com.

Compost Cab is a pioneer in community-based composting. Launched by Jeremy Brosowsky in 2010 as a local soil-exchange program in Washington, D.C., today the company diverts tons of organic material from landfills every day.

Compost Cab operates organics recycling programs for residential, commercial and municipal subscribers. “We’re proud of every pound of organics we divert from landfill to compost,” explains Brosowsky. “But we’re even prouder to be enabling people and organizations to live their values and take action everyday in support of the planet and against climate change.” Learn more at compostcab.com.

Jeremy Brosowsky, Founder/CEO, Compost Cab, Washington, DC,

Do you have a story to share about using and composting our products? If so, email marketing@worldcentric.com.

Our Mission: To be of service to people and the planet

We envision a thriving world where everyone's basic needs are met with a beneficial impact on the environment.

The Importance of Compostables

More than 26 million tons of plastic are sent to U.S. landfills each year. Products made from plants, not petroleum, conserve resources and support cleaner production methods while protecting the health of our planet and diverting waste from the landfill.

We are one of the few companies in the U.S. to sell only plant-based, certified compostable products while striving to be a model of sustainability and generosity. Since 2009, we have given at least 25% of our net profits annually to grassroots social and environmental organizations as well as offered discounts to schools and non-profits. We also offset our carbon emissions

from raw material to delivery. In 2010 we became a Certified B Corporation, and in 2013 converted our legal structure to a California Benefit Corporation, demonstrating our continued commitment to make a positive impact on society and the environment.

Our Promise

Our products are designed for performance, strength and aesthetic. Our claims are third party verified and we regularly audit outsourced factories under Fair Labor Organization guidelines to ensure fair wages and working conditions.

Partners

We're passionate about collaborating with businesses and organizations to pioneer innovative approaches to environmental challenges. By partnering with our customers, we hope to inspire others to shift their behavior around consumption and waste.

CARBON GIVING

Reduce Carbon Footprint

Through our offsets and use of renewable energy to power our office.

COMPOSTABLE

Designed to Compost

All of our products are designed to be compostable in a commercial compost facility.

ZERO WASTE

Reduce Waste

We strive to minimize waste by reducing our consumption and diverting waste to compost and recycling.

World Centric is a Certified B Corp.

As a Certified B Corporation, World Centric joins over 3,000 companies and individuals committed to a higher standard of transparency, accountability, and performance in the workplace.

Certified B Corporations are a new kind of business that balance purpose and profit. They are legally required to consider the impact of their decisions on their workers, customers, suppliers, community, and the environment.

This is a community of leaders, driving a global movement of people using business as a force for good.

Being part of the B Corp community means we harness the power of business to solve social and economic problems. Each recertification is a rigorous evaluation process determining that we have met comprehensive performance standards for our workers, community, governance and environment.

B Corps are accelerating a global culture shift to redefine success in business and build a more inclusive and sustainable economy. Some other notable B Corps include Patagonia, Ben & Jerry's, Eileen Fisher and Allbirds shoe company. Learn more at bcorporation.net.

Memberships and partnerships

1% for the Planet is a global network of businesses that donate 1% of annual sales directly to approved environmental and sustainability nonprofit organizations.

Post Landfill Action Network (PLAN) is a global movement of college and university student leaders who help launch programs to fight the cycle of campus waste.

Rubicon Global creates software to find cost savings across waste streams and develops innovative ways to reduce, reuse and recycle materials.

The National Minority Supplier Development Council advances business opportunities for Asian, Black, Hispanic and Native American suppliers in the corporate supply chain.

Green America businesses are committed to using business as a platform for social change by embedding social responsibility into the DNA of their company.

The California Green Business Network works with businesses to create a vibrant green economy that helps make communities healthier and more livable.

The US Composting Council advances compost manufacturing, compost utilization, and organics recycling to benefit their members, society, and the environment.

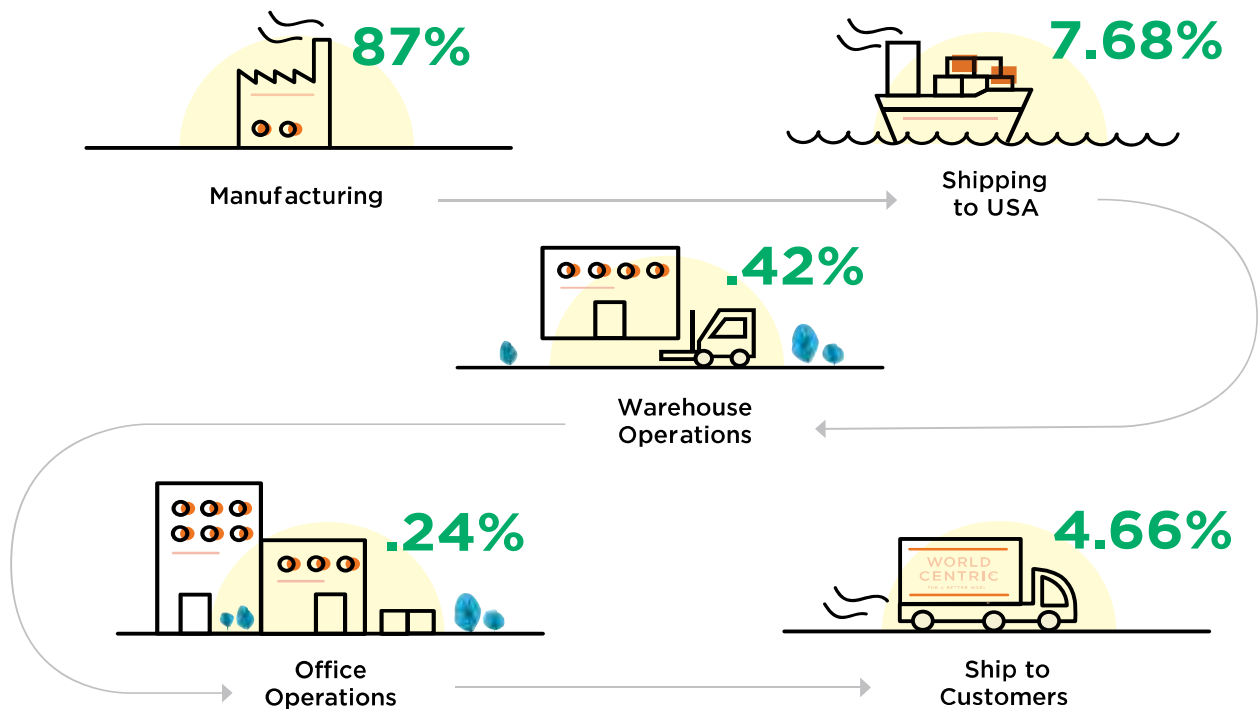

The Sustainable Packaging Coalition brings together businesses, educational institutions, and government agencies to collectively strengthen and advance the business case for more sustainable packaging.

Taking the right steps towards a zero carbon world

\$487,000
2020 Carbon Giving

Our Emissions

We assess and offset our carbon emissions created in the process of making our compostable goods and running our sustainable business, from the production of raw materials and manufacturing, all the way to the transportation to your front door.

Our Efforts

Individuals and companies can reduce their carbon footprint by reducing emissions from energy consumption and investing in renewable energy like solar and wind energy production, along with carbon offsetting programs such as planting trees.

Our Partnerships

Partnering with other grassroots organizations, we have become carbon neutral by focusing on carbon sequestration through tree planting and supporting projects with direct benefits to communities and people.

Take the first step towards sustainability

Climate change is one of the biggest challenges facing humanity. Every action we take as a business has a consequence, so we have taken steps to lower the carbon emissions that come from our manufacturing.

World Centric products take less energy to make than traditional disposables and we work to reduce

carbon emissions throughout the entire lifecycle of our compostable goods. We also partner with environmental and social organizations whose programs not only offset our carbon emissions but engage local communities.

We have the sustainability services to give you more tools to help your business make the switch to compostables.

Our team can help you identify the haulers, composters and other services in your area to increase waste diversion. We can also help you advocate for new services as well as develop user education, posters and signage to communicate proper waste disposal to customers, students and staff.

For more information, contact your sales representative or email zerowaste@worldcentric.com.

Our third party verifications and testing

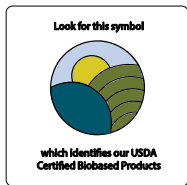

We take our efforts to create a better world seriously. We test our products using the American Society for Testing and Materials (ASTM) standards to ensure they break down in commercial composting facilities. We obtain our tree fiber from certified responsibly harvested forests. Additionally, we test for allergens and quality.

Biodegradable Products Institute (BPI)
BPI is a third-party organization that reviews and certifies commercially compostable products that meet ASTM standards for compostability. To learn more about BPI, please visit bpiworld.com.

TÜV AUSTRIA
TUV Austria is a third-party organization that reviews and certifies compostable products. Our TÜV certifications include OK Compost Home for our PLA bags and OK Compost Industrial for our fiber containers. For more information, visit tuv-at.be.

USDA BioPreferred Products
The USDA Biobased Product label indicates that a product has been independently certified to meet USDA BioPreferred program standards for biobased content. Biobased products are composed either partly or entirely of renewable plant materials. Visit biopreferred.gov to learn more.

Forest Stewardship Council® (FSC®)
FSC® certification is a market-based tool that supports responsible forest management worldwide. FSC certified forest products are verified from the forest of origin through the supply chain. The FSC label ensures that the forest products used are from responsibly harvested and verified sources. Visit fsc.org for more information.

Compost Manufacturing Alliance (CMA)
CMA is a third-party organization that utilizes a nationwide partnership of compost manufacturing facilities to provide field disintegration testing for food service products.

Gluten Testing
Our fiber plates have been tested by Anresco Laboratories, an independent facility for the measurement of cereal gluten at low levels, nominally within a range of 5-80 PPM, both in our raw materials and finished food products. Analytical Results: Wheat Straw Plates: <5 ppm

For a complete list of third-party reports and test results including fair labor audits, food safety audits, and product testing, please visit worldcentric.com/reports.

Product benefits and specifications for use

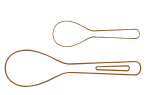

Sustainable Materials

The materials we use to make our compostable packaging are chosen for their sustainability. Our paper containers and molded fiber products are made from annually renewable plants such as bamboo, sugarcane bagasse and wheat straw, which also sequester carbon while growing. Paper cups, straws and bowls are made from sustainably sourced paper from FSC® certified sources.

Waste Reduction

When commercially composted, our foodservice ware diverts organic waste from the landfill and composts in 2-4 months. When compostable packaging is accepted, more food waste ends up in the compost where it belongs. Composting also keeps waste disposal local and creates jobs in the local economy. Composting is a great way to reduce greenhouse gas emissions and improve soil health.

Hot Items 	Product	Heat Resistance	Freezer Safe?	Time to Compost*
	Plant Fiber Containers and Cutlery	Suitable for foods up to 450° F; Oven and microwave safe	Yes	2-3 months

OUR PRODUCTS ARE RESPONSIBLE FROM START TO FINISH

Molded Fiber Containers & Cutlery

- Made from unbleached bamboo, sugarcane and wheat straw plant fibers
- Bio-lining (where indicated) made from plants
- Gluten free
- Conform to FDA guidelines for food use

PLA and TPLA Cutlery

- PLA Cutlery (non-GMO) made from plant sugars
- TPLA Cutlery has talc added for heat resistance
- Conform to FDA guidelines for food use

Paper Cups & Bowls with Bio-lining

- NoTree® cups and bowls made from crop residues and alternative fibers like bamboo and sugarcane
- White cups and bowls made from FSC® certified paper from responsibly managed forests
- Bio-based linings
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers & Lids

- Made from PLA, derived from plants
- Conform to FDA guidelines for food use

Food Scraps, Kitchen and Yard Waste Bags

- Made from synthetic and starch-based plastics
- Certified OK Compost Home by TÜV AUSTRIA
